

K.M.G. COLLEGE OF ARTS AND SCIENCE (AUTONOMOUS)

Approved by the Government of Tamil Nadu Permanently Affiliated to Thiruvalluvar University, Vellore. Recognized under Section 2(f) and 12(B) of the UGC Act 1956 Accredited by NAAC (2nd Cycle) with (CGPA of 3.24/4) 'A' Grade

P.G. AND RESEARCH DEPARTMENT OF MATHEMATICS

M.Sc., MATHEMATICS

SYLLABUS FOR II SEMESTER (CHOICE BASED CREDIT SYSTEM)

Under

LEARNING OUTCOMES-BASED CURRICULUM

FRAMEWORK (LOCF)

(Effective for the Batch of Students Admitted from 2024-2025)

PREFACE

The curriculum of Postgraduate Mathematics is the study of quantity, structure, space and change, focusing on problem solving, with wider scope of application in science, engineering, technology, social sciences etc. The purpose of the outcome-based education is meant to provide an exposure to the fundamental aspects in different branches of Mathematics and its applications, keeping in mind the growing needs for higher education, employability, entrepreneurship and social responsibility. The periodical restructuring of the syllabi is carried out to fulfill the requirements of graduate attributes, qualification descriptors, programme learning outcomes and course outcomes. The outcome-based education enriches the curriculum to deliver the basic principles, synthetic strategies, mechanisms and application-oriented learning for the benefit of students. It also includes self-learning module, minor projects and industrial internship to enable students to get equipped for higher studies and employment. The programme also includes training to students for seminar presentation, preparation of internship reports, hands-on training in lab courses, synthesis and its analysis, developing leadership qualities, organization and participation in the interdepartmental academic competitions. The allied papers provide a platform to strengthen the understanding of the core subjects. The non-major elective courses offer chances to learn and augment interest in other related fields. The outcome-based curriculum is intended to enrich the learning pedagogy to global standards. ICT enabled teaching-learning platforms are provided to students along with the interaction of international Mathematicians. The seminars periodically delivered by subject experts and former professors would certainly help the students to update with latest technology/trends in different fields of Mathematics. The OBE based evaluation methods will reflect the true cognitive levels of the students as the curriculum is designed with course outcomes and cognitive level correlations as per BLOOM's Taxonomy.

In pursuit of the Higher Education Department Policy Note 2022-23 Demand 20, Section 1.4, Tamil Nādu State Council for Higher Education took initiative to revamp the curriculum. On 27 July 2022, a meeting was convened by the Member-Secretary Dr. S. Krishnasamy enlightening the need of the hour to restructure the curriculum of both Undergraduate and Post-graduate programmes based on the speeches at the Tamil Nādu Legislative Assembly Budget meeting by the Honourable Higher Education Minister Dr K. Ponmudy and Honourable Finance Minister Dr. P. Thiagarajan. At present there are three different modes of imparting education in most of the educational institutions throughout the globe. Outcome Based Education, Problem Based Education, and Project Based Education.

Now our Honourable Higher Education Minister announced Industry Aligned Education. During discussion, Member Secretary announced the importance of question papers and evaluation as envisaged by the Honourable Chief Secretary to Government Dr, V. IraiAnbu. This is very well imbedded in Revised Bloom's Taxonomy forms three learning domains: the cognitive (knowledge), affective(attitude), and psychomotor (skill). This classification enables to estimate the learning capabilities of students.

Briefly, it is aimed to restructure the curriculum as student-oriented, skill-based, and institution industry- interaction curriculum with the various courses under "Outcome Based Education with Problem Based Courses, Project Based Courses, and Industry Aligned Programmes" having revised Bloom's Taxonomy for evaluating students skills. Three domains:

(i)Cognitive Domain

(Lower levels: K1: Remembering ; K2: Understanding ; K3: Applying; Higher levels: K4: Analysing ; K5: Evaluating; K6: Creating)

(ii) Affective Domain

(iii) Psychomotor Domain

ABOUT THE COLLEGE

The College was founded in the new millennium 2000 by the vision of late Shri.K.M.Govindarajan fondly known as Iyah, with a mission to offer higher education in the fields of Arts and Science to the needy and the poor middle class students of this area and make them fully employable and economically self-reliant. With a humble beginning of launching an elementary school named Thiruvalluvar Elementary School in the year 1952, Iyah groomed it into a Higher Secondary School and later into a college. Education was his soul and breath. The college has grown into a full-fledged educational hub offering 12 under graduate programmes, 8 post graduate programmes, 5 M.Phil research programmes and 4 Ph.D programmes. The college has been accredited with 'A' grade by NAAC in 2nd cycle and recognized under section 2(f) & 12(B) of the UGC act 1956. The College is permanently affiliated to Thiruvalluvar University. The College is also acquired the status of Autonomous from the academic year 2024-2025. The College is an associate member of ICT Academy and registered member of NPTEL and Spoken Tutorials of IIT Bombay. The college is also a member of INFLIBNET and NDL.

VISION OF THE COLLEGE

Empower young men and women by educating them in the pursuit of excellence, character building and responsible citizen.

MISSION OF THE COLLEGE

Offer higher education in the fields of Arts, Science & Management to the needy and make them fully self-dependent.

QUALITY POLICY OF THE COLLEGE

KMG Students achieve the best learning results and personal growth with modern education that equip them for working life and a changing society to become deserving citizens.

ABOUT THE DEPARTMENT

The Department of Mathematics was Established in the Year 2007 and made a Steady Growth to the Height of Establishing Post Graduate Level in the Year 2010. The Department offers Research Programme (M.Phil) from 2013. Our Aim is to Promote Students in the field of Mathematics and working Knowledge of Mathematics. Every Year Department Organizes National Conference/Seminar, Association Activities and Special Lecture.

VISION OF THE DEPARTMENT

To Emerge as a Global Center of Learning, Academic Excellence, and Innovative Research.

MISSION OF THE DEPARTMENT

- Imparting of Quality Mathematics Education and the inculcating of the spirit of Research through Innovative Teaching and Research Methodologies.
- To Provide an Environment where Students can Learn, become Competent users of Mathematics, and Understand the use of Mathematics in Other Disciplines.

ROGRAM EDUCATIONAL OBJECTIVES (PEOs)

- **PEO1: Knowledge Enhancement and Application:** Graduates will demonstrate proficiency in their chosen discipline by applying theoretical knowledge and analytical skills to solve complex problems in diverse professional contexts.
- **PEO2:** Effective Communication and Leadership: Graduates will exhibit strong communication skills and leadership abilities, enabling them to effectively collaborate with diverse teams, convey ideas persuasively, and contribute positively to organizational goals.
- **PEO3:** Ethical Decision-Making and Social Responsibility: Graduates will uphold ethical principles and social responsibility in their professional practices, making informed decisions that consider the well-being of stakeholders and society at large.
- **PEO4:** Continuous Learning and Adaptability: Graduates will embrace a commitment to lifelong learning, continuously updating their knowledge and skills to remain agile and adaptable in dynamic work environments characterized by rapid technological advancements and evolving global trends.
- **PEO5:** Entrepreneurial Mindset and Innovation: Graduates will demonstrate an entrepreneurial mindset, leveraging their knowledge and skills to identify opportunities, innovate solutions, and potentially initiate and manage ventures that contribute to economic growth and societal development.

PROGRAM OUTCOMES (POs)

On successful completion of the programme, the students will be able to:

POs	Graduate Attributes	Statements							
PO1	Disciplinary Knowledge	Acquire detailed knowledge and expertise in all the disciplines of the subject.							
PO2	Communication Skills	Ability to express thoughts and ideas effectively in writing, listening and confidently Communicate with others using appropriate media							
PO3	Critical Thinking	Students will develop aptitude Integrate skills of analysis, critiquing, application and creativity.							
PO4	Analytical Reasoning	Familiarize to evaluate the reliability and relevance of evidence, collect, analyze and interpret data.							
PO5	Problem Solving	Capacity to extrapolate the learned competencies to solve different kinds of non-familiar problems.							
PO6	Employability and Entrepreneurial Skill	Employability and Entrepreneurial Skill Equip the skills in current trends and future expectation for placements and be efficient entrepreneurs by accelerating qualities to facilitate startups in the competitive environment.							
PO7	Individual and Team Leadership Skill	Capability to lead themselves and the team to achieve organizational goals and contribute significantly to society.							
PO8	Multicultural Competence	Possess knowledge of the values and beliefs of multiple cultures and a global perspective.							
PO 9	Moral and Ethical awareness/reasoning	Ability to embrace moral/ethical values in conducting one's life.							
PO10	Lifelong Learning	Identify the need for skills necessary to be successful in future at personal development and demands of work place.							

PROGRAM SPECIFIC OUTCOMES (PSOs)

On successful completion of the M.Sc., Mathematics, the students will be able to:

PSOs	Statements
PSO1	Acquire good knowledge and understanding, to solve specific theoretical & applied problems in different area of mathematics & statistics.
PSO2	Understand, formulate, develop mathematical arguments, logically and use quantitative models to address issues arising in social sciences, business and other context /fields.
PSO3	To prepare the students who will demonstrate respectful engagement with other's ideas, behaviors, beliefs and apply diverse frames of references to decisions and actions. To create effective entrepreneurs by enhancing their critical thinking, problem solving, decision making and leadership skill that will facilitate startups and high potential organizations.

Correlation Rubrics:

High	Moderate	Low	No Correlation
3	2	1	-

Mapping of PSOs with POs:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10
PSO1	3	3	3	3	3	3	1	-	-	2
PSO2	3	2	3	3	3	3	1	-	-	2
PSO3	3	3	3	3	3	3	1	-	-	3

Title of the Course	ALGEBRAIC STRUCTURES	Hours/Week	07
Course Code	APCMA11	Credits	05
Category	CORE- I	Year & Semester	I & I
Prerequisites	UG Level Modern Algebra	Regulation	2024

Objectives of the course:

To introduce the concepts and to develop working knowledge on class equation, solvability of groups, finite abelian groups, linear transformations, real quadratic forms

UNITS	Contents	COs	Cognitive Levels				
I-TINU	Counting Principle - Class equation for finite groups and its applications - Sylow's theorems (For theorem 2.12.1, First proof only). Chapter 2: Sections 2.11 and 2.12 (Omit Lemma 2.12.5)	CO1	K1 K2 K3				
II-TINU	Solvable groups - Direct products - Finite abeliangroups- Modules Chapter 5 : Section 5.7 (Lemma 5.7.1, Lemma 5.7.2, Theorem 5.7.1) Chapter 2: Section 2.13 and 2.14 (Theorem 2.14.1 only) Chapter 4: Section 4.5	CO2	K1 K2 K3				
UNIT-III	Linear Transformations: Canonical forms – Triangularform - Nilpotent transformations. Chapter 6: Sections 6.4, 6.5	CO3	K1 K2 K3				
UNIT-IV	Jordan form - rational canonical form. Chapter 6 : Sections 6.6 and 6.7	CO4	K1 K2 K3				
V-TINU	Trace and transpose - Hermitian, unitary, normaltransformations, real quadratic form. Chapter 6 : Sections 6.8, 6.10 and 6.11 (Omit 6.9)

Title of the Course	REAL ANALYSIS - I	Hours/Week	07
Course Code	APCMA12	Credits	05
Category	CORE -II	Year & Semester	I & I
Prerequisites	UG Level Real Analysis Concepts	Regulation	2024

Objectives of the course:

To work comfortably with functions of bounded variation, Riemann- Stieltjes Integration, convergence of infinite series, infinite product and uniform convergence and its interplay between various limiting operations.

LINITS	Contonts	COs	Cognitive
UNIIS	Contents		Levels
I-TINU	 Functions of Bounded Variation - Introduction - Properties of monotonic functions - Functions of bounded variation - Total variation - Additive property of total variation - Total variation on [a, x] as a function of x - Functions of bounded variation expressed as the difference of two increasing functions - Continuous functions of bounded variation. Chapter – 6 : Sections 6.1 to 6.8 Infinite Series: Absolute and conditional convergence - Dirichlet'stest and Abel's test - Rearrangement of series - Riemann's theorem on conditionally convergent series. Chapter 8 : Sections 8.8, 8.15, 8.17, 8.18 	CO1	K1 K2 K3 K4
II-LINU	 The Riemann - Stieltjes Integral - Introduction - Notatio The definition of the Riemann - Stieltjes integral - Linear Properties - Integration by parts- Change of variable in a Riemann - Stieltjes integral - Reduction to a Riemann Integral – Euler's summation formula - Monotonically increasing integrators, Upper and lower integrals - Additive and linearity properties of upper, lower integrals - Riemann's condition - Comparison theorems. Chapter - 7 : Sections 7.1 to 7.14 	CO2	K1 K2 K3

III-TINU	The Riemann-Stieltjes Integral - Integrators of bounded variation- Sufficient conditions for the existence of Riemann-Stieltjes integrals-Necessary conditions for the existence of RS integrals- Mean value theorems -integrals as a function of the interval – Second fundamental theorem of integral calculus-Change of variable -Second Mean Value Theorem for Riemann integral- Riemann- Stieltjes integrals depending on a parameter- Differentiation under integral sign-Lebesgue criteriaon for existence of Riemann integrals. Chapter - 7 : 7.15 to 7.26	CO3	K1 K2 K3			
UNIT-IV	 Infinite Series and infinite Products - Double sequences -Double series - Rearrangement theorem for double series - A sufficient condition for equality of iterated series - Multiplication of series - Cesaro summability - Infinite products. Chapter - 8 Sec, 8.20, 8.21 to 8.26 Power series - Multiplication of power series - The Taylor's series generated by a function - Bernstein's theorem - Abel's limit theorem - Tauber's theorem Chapter 9 : Sections 9.14 9.15, 9.19, 9.20, 9.22, 9.23 	CO4	K1 K2 K3			
UNIT-V	 Sequences of Functions – Point wise convergence of sequences of functions - Examples of sequences of real - valued functions - Uniform convergence and continuity - Cauchy condition for uniform convergence - Uniform convergence of infinite series of functions - Riemann - Stieltjes integration – Non-uniform Convergence and Term-by-term Integration - Uniform convergence and differentiation - Sufficient condition for uniform convergence of aseries - Mean convergence. Chapter -9 Sec 9.1 to 9.6, 9.8, 9.9, 9.10, 9.11, 9.13 	CO5	K1 K2 K3

Title of the Course	FORMAL LANGUAGES AND AUTOMATA THEORY	Hours/Week	05
Course Code	APEMA14C	Credits	03
Category	ELECTIVE-I	Year & Semester	I & I
Prerequisites	Elementary Algebra	Regulation	2024

Objectives of the course:

- The purpose of this course is to acquaint the student with an overview of the theoretical foundations of computer science from the perspective of formal languages.
- Classify machines by their power to recognize languages. Employ finite state machines to solve problems in computing
- > Explain deterministic and non-deterministic machines.

Title of the Course	LIE GROUPS and LIE ALGEBRAS	Hours/Week	05
Course Code	APEMA15A	Credits	03
Category	ELECTIVE-II	Year & Semester	I & I
Prerequisites	UG level linear algebra and matrix groups	Regulation	2024

Objectives of the course:

- ➢ In physics, Lie groups appear as symmetry groups of physical systems, and their Lie algebras (tangent vectors near the identity) may be thought of as infinitesimal symmetry motions.
- Lie algebras and their representations are used extensively in physics, Notably in quantum mechanics and particle physics

UNITS	Contents	COs	Cognitive Levels

Title of the Course	FUZZY SETS AND THEIR APPLICATIONS	Hours/Week	05
Course Code	APEMA15C	Credits	03
Category	ELECTIVE-II	Year & Semester	I & I
Prerequisites	Knowledge of graphs, relations, composition	Regulation	2024

Objectives of the course:

Fuzzy is one of the latest topic in Mathematics that has real life applications. Hence it is essential for the students to learn this topic. This topic introduces the concept of uncertainty and fuzziness in logic that will enable the student to develop their intuitive mind further.

UNITS	Contents	COs	Cognitive Levels
I-TINU	Crisp sets and fuzzy sets Overview of Classical Sets, Membership Function, Height of afuzzy set – Normal and sub normal fuzzy sets – Support – Level sets, fuzzy points, α -cuts – Decomposition Theorems, Extension Principle.	CO1	K1 K2 K3
II-LINU	Operation on fuzzy sets Standard fuzzy operations –Union, intersection and complement – properties De. Morgan's laws - zy sets – Support– Level sets, fuzzy points, α–Cuts of fuzzy operations.	CO2	K1 K2 K3
III-LINU	Fuzzy relations Cartesian Product, Crisp relations – cardinality – operations and properties of Crisp and Fuzzy relations. Image and inverse image of fuzzy sets - Various definitions of fuzzy operations – Generalizations – Non interacting fuzzy sets, Tolerance and equivalence relations.	CO3	K1 K2 K3
AI-TINU	Decision making in Fuzzy environments General Discussion – Individual Decision making – multi person decision making – multi criteria decision making – multi stage decision making – fuzzy ranking methods – fuzzy linear programming.	CO4	K1 K2 K3
A-TINU	Applications Medicine – Economics – Fuzzy Systems and Genetic Algorithms – Fuzzy Regression – Interpersonal Communication – Other Applications	CO5	K1 K2 K3

Title of the Course	REAL ANALYSIS - II	Hours/Week	06					
Course Code	APCMA22	Credits	05					
Category	Core Paper-V	Year & Semester	I & II					
Prerequisites	Elements of Real Analysis	Regulation	2024					

Objectives of the Course:

To introduce measure on the real line, Lebesgue measurability and integrability, Fourier series and Integrals, in-depth study inmultivariable calculus.

UNITS	UNITS Contents		Cognitive
UNIIS	Contents	COS	Levels
	Measure on the Real line - Lebesgue Outer Measure - Measurable		K1
I-T]	sets - Regularity - Measurable Functions - Borel and Lebesgue Measurability		K2
Z	(Chapter - 2 Sec 2.1 to 2.5 (De Barra))	CO1	K3
		001	K4
	Integration of Functions of a Real variable - Integration of Non-		K1
II-II	negative functions - The General Integral - Riemann and Lebesgue Integrals		K2
I	(Chapter - 3 Sec 3.1,3.2 and 3.4 (De Barra))	CO2	K3
n			K4
III-TINU	Fourier Series and Fourier Integrals - Introduction - Orthogonal system of functions - The theorem on best approximation - The Fourier series of a function relative to an orthonormal system - Properties of Fourier Coefficients - The Riesz-Fischer Thorem - The convergence and representation problems in for trigonometric series - The Riemann - Lebesgue Lemma - The Dirichlet Integrals - An integral representation for the partial sums of Fourier series - Riemann's localization theorem - Sufficient conditions for convergence of a Fourier series at a particular point – Cesarosummability of Fourier series- Consequences of Fejes's theorem - The Weierstrass approximation theorem (Chapter 11: Sections 11.1 to 11.15 (Apostol))	CO3	K1 K2 K3 K4
VI-TINU	Multivariable Differential Calculus - Introduction - The Directional derivative - Directional derivative and continuity - The total derivative - The total derivative expressed in terms of partial derivatives - The matrix of linear function - The Jacobian matrix - The chain rule - Matrix form of chain rule - The mean - value theorem for differentiable functions - A sufficient condition for differentiability - A sufficient condition for equality of mixed partial derivatives - Taylor's theorem forfunctions of R ⁿ to R ¹ (Chapter 12 : Section 12.1 to 12.14 (Apostol))	CO4	K1 K2 K3 K4

	Implicit Functions and Extremum Problems: Functions with non-		K1	
	zero Jacobian determinants – The inverse function theorem- The		K)	
H	Implicit function theorem-Extrema of real valued functions of		π∠	
INN	severable variables-Extremum problems with side conditions.	CO5	K3	
	(Chapter 13 : Sections 13.1 to 13.7 (Apostol))		K4 K5

Title of the Course	PARTIAL DIFFERENTIAL EQUATIONS	Hours/Week	06
Course Code	APCMA23	Credits	04
Category	Core Paper-VI	Year & Semester	I & II
Prerequisites	UG level partial differential equations	Regulation	2024

Objectives of the Course:

> To classify the second order partial differential equations and to study Cauchy problem, method of separation of variables, boundary valueproblems.

			Cognitive
UNIIS	Contents	COs	Levels
	Mathematical Models and Classification of second order equation : Classical equations-Vibrating string – Vibrating membrane – waves in		K1
I-I	elastic medium – Conduction of heat in solids – Gravitational potential		K2
INU	– Second order equations in two independent variables – canonical forms – equations with constant coefficients – general solution.	CO1	К3
	(Chapter 2 : Sections 2.1 to 2.6) (Chapter 3 : Sections 3.1 to 3.4 (Omit 3.5))		K4
	Cauchy Problem :		
	The Cauchy problem – Cauchy- Kowalewsky theorem –		K 1
-	Non-homogeneous boundary conditions – Finite string with fixed	CO2	K2
	ends – Non-homogeneous wave equation – Riemann method –		K3
n	Goursat problem – spherical wave equation – cylindrical wave		K4,K5
	(Chapter 4 : Sections 4.1 to 4.11)		
	Method of separation of variables:		K1
III-1	Separation of variable- Vibrating string problem – Existence and uniqueness of solution of vibrating string problem - Heat conduction	a a	K2
Ę	problem – Existence and uniqueness of solution of heat conduction	CO3	K3
5	problem – Laplace and beam equations. (Chapter 6 : Sections 6.1 to 6.6 (Omit section 6.7))		K4,K5
	Boundary Value Problems :		K1
VI-J	Boundary value problems – Maximum and minimum principles – Uniqueness and continuity theorem – Dirichlet Problem for a circle,		K2
IN	a circular annulus, a rectangle- Dirichlet problem involving Poisson	CO4	K3
5	equation – Neumann problem fora circle and a rectangle. (Chapter 8 : Sections 8.1 to 8.9)		K4

	Green's Function:		K1
V-TINU	The Delta function – Green's function – Method of Green's function –		K)
	Dirichlet Problem for the Laplace and Helmholtz operators – Method		K2
	of images and eigen functions - Higher dimensional problem -	CO5	K3
	Neumann Problem.		V A
	(Chapter 10 : Section 10.1 to 10.9)		K 4

Title of the Course	R PROGRAMMING LANGUAGE (Only Practical)	Hours/Week	03
Course Code	APEMA24C	Credits	03
Category	Elective Course-III	Year & Semester	I & II
Prerequisites	-	Regulation	2024

Objectives of the Course:

- To master the use of R interactive environment with an understanding of the use of R documentation.
- > To use R for descriptive statistics and write simple programs in R.

Contents

- 1. Perform arithmetic operations.
- 2. Create a Sequence and find the mean of numbers.
- 3. Find the first 10 Fibonacci numbers.
- 4. Find the factors of a given number.
- 5. Find the Maximum and Minimum of a given vector.
- 6. Read the CSV file and display the content.
- 7. Create matrix and perform matrix operations.
- 8. Create a bar plot, a scatter plot and a line graph.
- 9. Create a data frame and display the details.
- 10. Extract rows and columns from a data frame.
- 11. Create a list containing strings, numbers and vectors.
- 12. Find the Correlation and the Linear Regression between two variables.
- 13. Perform conditional executions.
- 14. Fit Binomial, Poisson and Normal distributions. Perform Chi Square test for independence of attributes.

COURSE DESCRIPTORS

Title of the Course	WAVELETS	Hours/Week	03
Course Code	APEMA25A	Credits	03
Category	Elective Course-IV	Year & Semester	I & II
Prerequisites	Basic Analysis and Linear Algebra	Regulation	2024

Objectives of the Course:

> To establish the theory necessary to understand and use wavelets andrelated constructions.

LINITS	Contonts	COs	Cognitive
UNIIS	Contents	COS	Levels
	An Overview		K1
Ξ	analysis – Inversion formulas and duals – Classification of Wavelets –		K2
	Multi-resolution analysis – Spines and Wavelets. Fourier Analysis :		V2
5	Fourier and Inverse Fourier Transformation – Continuous Time	CO1	K3
	convolution – The delta function – Fourier Transformation of square integrable functions.		K4
	Fourier Analysis (Cont)		IZ 1
—	Fourier Series - Basic Convergence Theory - Poisson Summation		KI
	Formula.		K2
	Wavelet Transforms and Time Frequency Analysis	CO2	K3
5	The Gabor Transforms – Short time Fourier Transforms and the uncertainty principle – The integral Wayelet Transform – Dyadic		КЛ
	Wavelets – Inversion – Frames – Wavelet Series		174
	Cardinal Spline Analysis	CO3	K1
	Cardinal Spline spaces – B-splines and their basic properties – The time		К2
	scale relation and an interpolating graphical display algorithm – B-Net		112
Z	representations and computation of cardinal splines - Constructions of spline application formulas		K3
	Construction of Spline interpolation formulas.		K4
	Scaling functions and Wavelets		K1
Ν	Multi-resolution analysis - Scaling functions with finite two scale		к2
	relation – Direction sum Decompositions of - Wavelets and their duals.	004	IK2

Title of the Course	MACHINE LEARNING AND ARTIFICIAL INTELLIGENCE	Hours/Week	03
Course Code	APEMA25B	Credits	03
Category	Elective Course-IV	Year & Semester	I & II
Prerequisites	-	Regulation	2024

Objectives of the Course:

≻To Learn about Machine Intelligence and Machine Learning applications

>To implement and apply machine learning algorithms to real-world applications.

> To identify and apply the appropriate machine learning technique to classification, pattern recognition, optimization and decision problems. To understand how to perform evaluation of learning algorithms and model selection.

>To understand about the basic theory of problem solving paradigms and search strategies in artificial intelligence

>To make the students familiar with knowledge representation, planning, learning, natural language processing and robotics

Course Learning Outcomes (for Mapping with POs and PSOs)

COs	CO Description	Cognitive Level
CO1	Apply Transcendental and Polynomial Equations by using SCILAB	K1,K2,K3
CO2	Apply Eigen value Problems by using SCILAB	K1,K2,K3
CO3	Apply Interpolation by using SCILAB	K1,K2,K3
CO4	Apply Differentiation and Integration by using SCILAB	K1,K2,K3
CO5	Apply Ordinary Differential Equations Initial Value Problems by using SCILAB	K1,K2,K3

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PSO1	PSO2	PSO3
CO1	3	2	3	2	1	2	1	-	-	1	3	2	2
CO2	2	3	2	3	3	2	1	-	-	1	2	3	1
CO3	3	3	1	3	1	3	1	-	-	1	3	2	1
CO4	2	1	2	1	3	2	1	-	-	1	2	3	2
CO5	3	2	3	3	2	1	1	-	-	1	2	1	2

Title of the Course	Differential Equations using SCILAB	Hours/Week	04
Course Code	APSMA26E	Credits	02
Category	Skill Enhancement Course-I	Year & Semester	I & II
Prerequisites	-	Regulation	2024

Objectives of the Course:

- Understand the basic commands
- Solve the system of equations
- Evaluate the polynomials
- Solve the Ordinary differential equations.

UNITS	Contents	COs	Cognitive
	Contents	COS	Levels
	Introduction to Scilabb Login - Talking between Scilab and the Editor - Basic		K1
LIN	Commands - Linear Algebra - Loops and Conditionals - Help	CO1	K2
5	in Scilab.		K3
	(Chapter 1: Sections 1.1 to 1.7)		
Ξ	Matrix Calculation		K 1
	Systems of Equations.		K2
N	(Chapter 2: Section 2.2)	CO2	K3
	Data and Function Plots		
H	Plotting Lines and Data - Adding a Line - Hints for Good Graphs –	CO3	K1
Ė	Graphs - Function Plotting – Component Arithmetic - Printing Graphs -		K2
N	Saving Graphs.		K3
	(Chapter 3: Sections 3.2, 3.3)		
Ν	Polynomials		K1
Ē	Evaluation of Polynomials – Polynomials - Linear Least Squares	CO4	K2
Z	(Heath Computer Problem).	04	K3,K6
	(Chapter 6: Sections 6.2, 6.3, 6.4)		- , -
	Differential Equation Differential Equations - Scalar ODE's - Order 2 ODE's		K 1
-TI	Enterentin Equations Sealar ODE 5 Order 2000 5.	CO5	K2
NN.	(Chapter 8: Sections 8.2)		K3

Course Learning Outcomes (for Mapping with POs and PSOs)

COs	CO Description	Cognitive Level
CO1	Understand the basic commands SCILAB	K1,K2,K3
CO2	Understand Matrix Calculation by using SCILAB	K1,K2,K3
CO3	Understand Data and Function Plots by using SCILAB	K1,K2,K3
CO4	Evaluation of Polynomials by using SCILAB	K1,K2,K3,K6
CO5	Understand Differential Equations by using SCILAB	K1,K2,K3

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PSO1	PSO2	PSO3
CO1	3	2	3	2	1	2	1	-	-	1	3	2	2
CO2	2	3	2	3	3	2	1	-	-	1	2	3	1
CO3	3	3	1	3	1	3	1	-	-	1	3	2	1
CO4	2	1	2	1	3	2	1	-	-	1	2	3	2
CO5	3	2	3	3	2	1	1	-	-	1	2	1	2

Title of the Course	INDUSTRIAL MATHEMATICS/STATISTICS USING LATEST PROGRAMMING PACKAGES	Hours/Week	04
Course Code	APSMA26F	Credits	02
Category	Skill Enhancement Course-I	Year & Semester	I & II
Prerequisites	-	Regulation	2024

Objectives of the Course:

Industrial Mathematics Course aim to develop the ability to find and use efficient mathematical methods to solve problems in industrial settings.

UNITS	Contonts	COg	Cognitive
	Contents	COS	Levels
Η.	Mathematics in industry- Overview of the case studies-Units and		K1
LIN	dimensions - Diffusion equations - Heat conduction equations		K2
n		COI	K3
Π	Boundary conditions -Solving the heat/diffusion equation - Scaling		K1
Ė	equations - Dimensional analysis		K2
n		CO2	K3
Ι	Continuous Casting - Introduction to the case study problem - The		K 1
	Boltzmann similarity solution- A moving boundary problem - The	CO2	К2
IN	pseudo- steady-state approximate solution-Solving the continuous	COS	K3
	casting case Study		113
Ν	Water Filtration - Introduction to the case study problem -		K 1
L	Stretching transformations - Diffusion from a point source -Solving the	CO4	K2
NN	water filtration case study		K3,K6
Λ	Laser Drilling -Introduction to the case study problem - Method		K1
L-TI	of perturbations -Boundary perturbations - Solving the laser drilling case	CO5	K2
NN	study		K3,K6

Title of the Course	RESEARCH TOOLS AND TECHNIQUES	Hours/Week	04
Course Code	APSMA26G	Credits	02
Category	Skill Enhancement Course-I	Year & Semester	I & II
Prerequisites	-	Regulation	2024

Objectives of the Course:

- Research Tools and Techniques are the Statistical methods of collection, analysis, interpretation, presentation and organization of data.
- Statistics provides numerous tools and Techniques to analyze the data and interpret the results of the analysis.

UNITS	Contonts	COs	Cognitive
	Contents		Levels
I-			K1
LIN	Research Process- Research Design	CO1	K2
IJ			К3
Π			K1
-TI	Research Problem-Variables and Their Types	CO2	K2
NN			K3,K6
II		CO3	K 1
[-L]	Formulation of Hypothesis– Sampling- Tools of Data Collection		K2
NN			K3
Ν			K1
I-TINU	Data Analysis- Interpretation of Data		K2
			К3
UNIT-V	Research Methods - Descriptive or Survey Method -	CO5	K1
	Experimental Method		K2
			K3
