

K.M.G. COLLEGE OF ARTS AND SCIENCE

(AUTONOMOUS)

Approved by the Government of Tamil Nadu

Permanently Affiliated to Thiruvalluvar University, Vellore

Recognized under Section 2(f) and 12(B) of the UGC Act 1956

Accredited by NAAC (2nd Cycle) with (CGPA of 3.24/4) 'A' Grade

DEPARTMENT OF DATA SCIENCE

B.Sc., DATA SCIENCE

SYLLABUS

(CHOICE BASED CREDIT SYSTEM)

Under

LEARNING OUTCOMES-BASED CURRICULUM

FRAMEWORK (LOCF)

(Effective for the Batch of Students Admitted from 2024-2025)

PREFACE

Data Science is a vast field comprising many topics of Statistics, Mathematics, and IT. A Data Science course syllabus for beginners covers basic and advanced concepts of data analytics, Machine learning, Statistics, and programming languages like Python or R. It also teaches students how to interpret large datasets and identify patterns to create predictive models. Data Science has come a long way. Data Scientists were once referred to as business problem solvers“ who knew how to make sense of incoherent data clusters. Fast-forward to the present, Data Scientists are the most important resources for any business looking to thrive in this mad rush. They are now the wizards of all problem solvers“.

The course is enabled to include several interdisciplinary areas like: programming languages, algorithms, operating systems, databases, machine learning, data mining, business intelligence, big data, probability and statistics, data optimization, statistical simulation and data analysis, management decision analysis, decision models and predictive analysis. Data Science has gained paramount importance in the computer science domain. The need for scientists who understand data in all its aspects will continue to grow strongly. Students graduating from the program will have significantly more depth and breadth in the broad area of Data Science and receive all the information they need to work with various kinds of data and statistical data. The program is designed so that students have in-depth knowledge of the many approaches, aptitudes, methodologies, and instruments needed to deal with corporate data. Students receive instruction in the abilities needed to find the needed solutions and assist in making significant judgments.

This is the primary reason the syllabus of Data Science courses includes concepts that touch base on cloud computing, big data, natural language processing, and data sentiment analysis. The future of Data Science is estimated to bring opportunities in various areas of banking, finance, insurance, entertainment, telecommunication, automobile, etc. A data scientist will help grow an organization by assisting them in making better decisions. Data science has become important due to recent technology disruptions. Most fundamental is Moore's Law which has driven an exponential growth in computing, storage, and communications per rupee over the past 50 years. This rate of growth shows no signs of abating. Consequently, today we have the Internet of Things: a plethora of sensors costing 10s of rupees or less, a global Internet with almost limitless bandwidth, and enormous storage in global clouds. The present era is full of

technological advances in almost all spectrum of life and we are flooded with enormous amount of data. There is an increasing demand of capturing, analyzing, and synthesizing this large amount of data sets in a number of application domains to better understand various phenomena and to convert the information available in the data into actionable strategies such as new scientific discoveries, business applications, policy making, and healthcare etc.

Data science is the area where applications of various tools and techniques from the disciplines of applied statistics, mathematics and computer science are used to get greater insight and to make better and informed decisions for various purposes by analyzing a large amount of data. Consequently, the study of data science as a discipline has become essential to cater the growing need for professionals and researchers to deal with the future challenges.

The purpose of the outcome-based education is meant to provide an exposure to the fundamental aspects in different branches of Computer Science and its applications, keeping in mind the growing needs for higher education, employability, entrepreneurship and social responsibility. The periodical restructuring of the syllabi is carried out to fulfill the requirements of graduate attributes, qualification descriptors, programme learning outcomes and course outcomes. The outcome-based education enriches the curriculum to deliver the basic principles, synthetic strategies, mechanisms and application-oriented learning for the benefit of students. It also includes self-learning module, minor projects and industrial internship to enable students to get equipped for higher studies and employment. The non-major elective courses offer chances to learn and augment interest in other related fields. The outcome-based curriculum is intended to enrich the learning pedagogy to global standards. ICT enabled teaching-learning platforms are provided to students along with the interaction of international scientists. The seminars periodically delivered by industrialists, subject experts and former professors would certainly help the students to update with latest technology/trends in different fields of chemistry. The exposure to the industrial internship and MoUs with industries can open an avenue for a start-up and its progress would be followed regularly. The OBE based evaluation methods will reflect the true cognitive levels of the students as the curriculum is designed with course outcomes and cognitive level correlations as per BLOOM's Taxonomy.

ABOUT THE COLLEGE

The College was founded in the new millennium 2000 by the vision of late Shri.K.M.Govindarajan fondly known as Iyah, with a mission to offer higher education in the fields of Arts and Science to the needy and the poor middle class students of this area and make them fully employable and economically self-reliant. With a humble beginning of launching an elementary school named Thiruvalluvar Elementary School in the year 1952, Iyah groomed it into a Higher Secondary School and later into a college. Education was his soul and breathe. The college has grown into a full-fledged educational hub offering 12 under graduate programmes, 8 post graduate programmes, 5 M.Phil research programmes and 4 Ph.D programmes. The college has been accredited with 'A' grade by NAAC in 2nd cycle and recognized under section 2(f) & 12(B) of the UGC act 1956. The College is permanently affiliated to Thiruvalluvar University. The College is also acquired the status of Autonomous from the academic year 2024-2025. The College is an associate member of ICT Academy and registered member of NPTEL and Spoken Tutorials of IIT Bombay. The college is also a member of INFLIBNET and NDL.

VISION OF THE COLLEGE

Empower young men and women by educating them in the pursuit of excellence, character building and responsible citizen.

MISSION OF THE COLLEGE

Offer higher education in the fields of Arts, Science & Management to the needy and make them fully self-dependent.

QUALITY POLICY OF THE COLLEGE

KMG Students achieve the best learning results and personal growth with modern education that equip them for working life and a changing society to become deserving citizens.

ABOUT THE DEPARTMENT

Department of Data Science (DS) has been established in the year 2023 with a goal of training students for data-centric world and human values. The students will have an opportunity to learn principles, tools and techniques to model various real-world problems, analyze them, and discover useful information. The primary focus of this programme is to equip students with statistical skills, Learning algorithms, knowledge discovery and visualization skills.

VISION OF THE DEPARTMENT

The vision of the Department of Data Science is to create the next generation of students as data scientists who will solve these grand challenges and innovate through world-class research to take advantage of these opportunities.

MISSION OF THE DEPARTMENT

- To develop the skills and knowledge to analyze data in many forms and communicate insights.
- To impart quality and value based education and contribute towards the innovation of computing, expert system, Data Science to raise satisfaction level of all stakeholders.
- Our effort is to apply new advancements in high performance computing hardware and software.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

- 1. Professional Excellence:** Graduates will demonstrate competency and excellence in their chosen fields of study, applying theoretical knowledge to practical situations effectively.
- 2. Character Development:** Graduates will exhibit strong moral and ethical character, upholding values of integrity, honesty, and respect for others in both personal and professional endeavors.
- 3. Leadership and Citizenship:** Graduates will emerge as responsible leaders and active citizens, contributing positively to their communities and society at large through their actions and initiatives.
- 4. Continuous Learning:** Graduates will engage in lifelong learning and professional development activities, adapting to evolving technologies, methodologies, and societal needs.
- 5. Self-Dependency and Entrepreneurship:** Graduates will possess the skills and mindset necessary to be self-reliant and entrepreneurial, capable of creating opportunities for themselves and others through innovation and initiative.
- 6. Effective Communication and Collaboration:** Graduates will demonstrate proficiency in communication skills, both verbal and written, and exhibit the ability to collaborate effectively with diverse teams and stakeholders.
- 7. Global Perspective:** Graduates will have a broad understanding of global issues and perspectives, demonstrating cultural sensitivity and adaptability in multicultural environments.

PROGRAM OUTCOMES (POs)

On successful completion of the programme, the students will be able to:

| POs | Graduate Attributes | Statements |
|------|---|---|
| PO1 | Disciplinary Knowledge | Acquire detailed knowledge and expertise in all the disciplines of the subject. |
| PO2 | Communication Skills | Ability to express thoughts and ideas effectively in writing, listening and confidently Communicate with others using appropriate media |
| PO3 | Critical Thinking | Students will develop aptitude Integrate skills of analysis, critiquing, application and creativity. |
| PO4 | Analytical Reasoning | Familiarize to evaluate the reliability and relevance of evidence, collect, analyze and interpret data. |
| PO5 | Problem Solving | Capacity to extrapolate the learned competencies to solve different kinds of non-familiar problems. |
| PO6 | Employability and Entrepreneurial Skill | Equip the skills in current trends and future expectations for placements and be efficient entrepreneurs by accelerating qualities to facilitate startups in the competitive environment. |
| PO7 | Individual and Team Leadership Skill | Capability to lead themselves and the team to achieve organizational goals and contribute significantly to society. |
| PO8 | Multicultural Competence | Possess knowledge of the values and beliefs of multiple cultures and a global perspective. |
| PO 9 | Moral and Ethical awareness/reasoning | Ability to embrace moral/ethical values in conducting one's life. |
| PO10 | Lifelong Learning | Identify the need for skills necessary to be successful in future at personal development and demands of work place. |

PROGRAM SPECIFIC OUTCOMES (PSOs)

On successful completion of the B.Sc., Data Science, the students will be able to:

| PSOs | Statements |
|------|---|
| PSO1 | Able to apply data analytical skills that rely on mathematical and statistical methods to solve problems in a data-driven world. |
| PSO2 | Able to understand the nuances of data analytical skills to evolve innovative ideas and communicate the social relevance and impact of their analytical findings. |
| PSO3 | Becoming analytical experts and data entrepreneurs with exemplary behavior safeguarding the public interest. |

Correlation Rubrics:

| High | Moderate | Low | No Correlation |
|------|----------|-----|----------------|
| 3 | 2 | 1 | - |

Mapping of PSOs with POs:

| | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 |
|------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|
| PSO1 | 3 | 3 | 3 | 3 | 3 | 3 | 2 | - | - | 2 |
| PSO2 | 3 | 3 | 2 | 3 | 2 | 3 | 2 | - | - | 3 |
| PSO3 | 3 | 3 | 3 | 3 | 3 | 3 | 2 | 2 | 3 | 3 |

K.M.G. COLLEGE OF ARTS AND SCIENCE**(AUTONOMOUS)****Subject and Credit System- B.Sc., Data Science****(Effective for the Batch of Students Admitted from 2024-2025)**

| Semester | Part | Category | Course Code | Course Title | Ins.Hrs/ Week | Credit | Maximum Marks | | |

Consolidated Semester wise and Component wise Credit distribution

| Parts | Sem I | Sem II | Sem III | Sem IV | Sem V | Sem VI | Total Credits |
|-----------------|-------|--------|---------|--------|-------|--------|---------------|
| Part I | 3 | 3 | 3 | 3 | - | - | 12 |
| Part II | 3 | 3 | 3 | 3 | - | - | 12 |
| Part III | 13 | 13 | 13 | 13 | 22 | 18 | 92 |
| Part IV | 4 | 4 | 5 | 4 | 4 | 3 | 24 |
| Part V | - | - | - | - | - | - | - |
| Total | 23 | 23 | 24 | 23 | 26 | 21 | 140 |

*Part I, II, and Part III components will be separately taken into account for CGPA calculation and classification for the under graduate programme and the other components. IV, V has to be completed during the duration of the programme as per the norms, to be eligible for obtaining the UG degree.

COURSE DESCRIPTORS

| | | | |
|----------------------------|--------------------------------|----------------------------|-------|
| Title of the Course | PYTHON PROGRAMMING | Hours/Week | 05 |
| Course Code | AUCDS 11 | Credits | 05 |
| Category | Core-1 | Year & Semester | I & I |
| Prerequisites | Basics of Programming Language | Regulation | 2024 |

Objectives of the course:

- To make students understand the concepts of Python programming.
- To apply the OOPs concept in PYTHON programming.
- To impart knowledge on demand and supply concepts
- To make the students learn best practices in PYTHON programming
- To know the costs and profit maximization

| UNITS | Contents | COs | Cognitive Levels |
|----------|---|-------------------|----------------------|
| UNIT-I | Basics of Python Programming: History of Python-Features of Python – Literal – Constants - Variables - Identifiers–Keywords-Built-in Data Types-Output Statements – Input Statements-Comments – Indentation-Operators-Expressions-Type conversions. Python Arrays: Defining and Processing Arrays – Array methods. | CO1 CO3 | K1 K2 K3 |
| UNIT-II | Control Statements: Selection/Conditional Branching statements: if, if-else, nested if and if-elif-else statements. Iterative Statements: while loop, for loop, else suite in loop and nested loops. Jump Statements: break, continue and pass statements. | CO1 CO2 CO3 | K1 K2 K3 K4 |
| UNIT-III | Functions: Function Definition – Function Call – Variable Scope and its Lifetime-Return Statement. Function Arguments: Required Arguments, Keyword Arguments, Default Arguments and Variable Length Arguments-Recursion. Python Strings: String operations- Immutable Strings-Built-in String Methods and Functions-String Comparison. Modules: import statement- The Python module – dir() function – Modules and Namespace – Defining our own modules. | CO3 CO4 | K1 K2 K3 K5 |

| | | | |
|----------------|---|--------------------------|----------------------------|
| UNIT-IV | <p>Lists: Creating a list -Access values in List-Updating values in Lists- Nested lists -Basic list operations-List Methods. Tuples: Creating, Accessing, Updating and Deleting Elements in a tuple – Nested tuples– Difference between lists and tuples.</p> <p>Dictionaries: Creating, Accessing, Updating and Deleting Elements in a Dictionary – Dictionary Functions and Methods - Difference between Lists and Dictionaries..</p> | CO2 CO3 CO4 | K1 K2 K3 K5 |
| UNIT-V | <p>Python File Handling: Types of files in Python - Opening and Closing files-Reading and Writing files: write() and writelines() methods- append() method – read() and readlines() methods – with keyword – Splitting words– File methods - File Positions- Renaming and deleting files. Python Dictionaries- Numpy, Pandas, Matplotlib, Scipy.</p> | CO2 CO3 CO4 CO5 | K1 K2 K3 K5 K6 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|---------------------------------------|----------------------------|-------|
| Title of the Course | Problem Solving Technique | Hours/Week | 02 |
| Course Code | AUFDS15 | Credits | 02 |
| Category | Skill Enhancement (Foundation Course) | Year & Semester | I & I |
| Prerequisites | Basics Idea about problem solving | Regulation | 2024 |

Objectives of the course:

- Familiarize with writing of algorithms, fundamentals of C and philosophy of problem solving.
- Implement different programming constructs and decomposition of problems into functions
- Use data flow diagram, Pseudocode to implement solutions.
- Define and use of arrays with simple applications
- Understand about operating system and their uses

| UNITS | Contents | COs | Cognitive Levels |
|----------|--|-------------------|----------------------|
| UNIT-I | <p>Programming Languages: Machine language, Assembly language, High- level language, 4 GL and 5GL-Features of good programming language. Translators: Interpreters and Compilers.</p> <p>Data: Data types, Input, Processing of data, Arithmetic Operators, Hierarchy of operations and Output. Different phases in Program Development Cycle (PDC).</p> | CO1 CO3 | K1 K2 K3 |
| UNIT-II | <p>Structured Programming: Algorithm: Features of good algorithm, Benefits and drawbacks of algorithm.</p> <p>Flowcharts: Advantages and limitations of flowcharts, when to use flowcharts, flowchart symbols and types of flowcharts. Pseudocode: Writing a pseudocode. Coding, documenting and testing a program: Comment lines and types of errors.</p> <p>Program design: Modular Programming.</p> | CO1 CO2 CO3 | K1 K2 K3 K4 |
| UNIT-III | <p>Selection Structures: Relational and Logical Operators - Selecting from Several Alternatives – Applications of Selection Structures. Repetition Structures: Counter Controlled Loops –Nested Loops– Applications of Repetition Structures.</p> | CO3 CO4 | K1 K2 K3 K5 |

| | | | |
|---|--|-------------------|-----------------|
| UNIT-IV | Data Type: Numeric Data and Character Based Data. Arrays: One Dimensional Array - Two Dimensional Arrays – Strings as Arrays of Characters. Data Flow Diagrams: Definition, DFD symbols and types of DFDs. Program Modules: Subprograms-Value and Reference parameters- Scope of a variable - Functions– Recursion. | CO2 CO3 CO4 | K1,K2, K3,K5 |
| UNIT-V | Files: File Basics-Creating and reading a Sequential file-Modifying Sequential Files. Problem solving approaches: Greedy Algorithm, Search and Sorting, Dynamic Programming, Branch and Bound. | CO2 CO3 CO4 | K1,K2, K3,K5 |

Course Learning Outcomes (for Mapping with POs and PSOs)

On completion of the course the students should be able to

| COs | CO Description | Cognitive Level |
|-----|---|-----------------|
| CO1 | Analyze the programming languages and Study the data types and arithmetic operations. | K1,K4 |
| CO2 | Know about the algorithms. Develop program using flow chart and pseudocode. | K1,K2,K4 |
| CO3 | Determine the various operators.Explain about the structures. Illustrate the concept of Loops | K1,K2,K3 |
| CO4 | Illustrate the DFD and program modules | K1,K2,K5 |
| CO5 | Creating and reading Files and discuss Problem solving approaches | K1,K2,K4 |

| | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PSO1 | PSO2 | PSO3 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO1 | 3 | 2 | 3 | 2 | 2 | - | - | - | - | - | 3 | 3 | 3 |
| CO2 | 3 | 1 | 3 | 2 | 2 | 1 | 1 | 1 | - | 1 | 3 | 3 | 3 |
| CO3 | 2 | 2 | 3 | 3 | 2 | - | - | 2 | - | 1 | 3 | 3 | 3 |
| CO4 | 3 | 1 | 3 | 1 | 2 | 1 | - | - | - | - | 3 | 3 | 3 |
| CO5 | 3 | 2 | 2 | 2 | 2 | 2 | - | - | 1 | 1 | 3 | 3 | 3 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|------------------------|----------------------------|-------|
| Title of the Course | Practical -Python Lab | Hours/Week | 05 |
| Course Code | AUCPDS12 | Credits | 05 |
| Category | Core Course CC-II | Year & Semester | I & I |
| Prerequisites | Knowledge of Computers | Regulation | 2024 |

Objectives of the course:

1. Be able to design and program Python applications.
2. Be able to create loops and decision statements in Python.
3. Be able to work with functions and pass arguments in Python.
4. Be able to build package Python modules for reusability.
5. Be able to read and write files in Python.

| UNITS | Contents | COs | Cognitive Levels |
|---------------------|--|------------|------------------|
| LABEXERCISES | <ol style="list-style-type: none"> 1. Program Using variables, constants, I/O statements in Python. 2. Program using Operators in Python. 3. Program using Conditional Statements. 4. Program using Loops. 5. Program using Jump Statements. 6. Program using Functions. 7. Program using Recursion. 8. Program using Arrays. 9. Program using Strings. 10. Program using Modules. 11. Program using Lists. 12. Program using Tuples. 13. Program using Dictionaries. 14. Program for File Handling. | CO1 CO3 | K1 K2 K3 |

Course Learning Outcomes (for Mapping with POs and PSOs)

On completion of the course the students should be able to

| COs | CO Description | Cognitive Level |
|-----|---|-----------------|
| CO1 | Demonstrate the understanding of syntax and semantics of Python programming | K1,K3 |
| CO2 | Identify the problem and solve using PYTHON programming techniques. | K1,K2,K4 |
| CO3 | Identify suitable programming constructs for problem solving. | K1,K2,K3 |
| CO4 | Analyze various concepts of PYTHON language to solve the problem in an efficient way. | K1,K2,K5 |
| CO5 | Develop a PYTHON program for a given problem and test for its correctness. | K1,K2,K6 |

| | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PSO1 | PSO2 | PSO3 |

| CO5 | 3 | 2 | 2 | 2 | 2 | 2 | - | - | 1 | 1 | 3 | 3 | 3 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|---------------------------------------|----------------------------|-------|
| Title of the Course | MATHEMATICAL STATISTICS-I | Hours/Week | 04 |
| Course Code | AUEMA13A | Credits | 03 |
| Category | ELECTIVE COURSE -I | Year & Semester | I & I |
| Prerequisites | 12 th Standard Mathematics | Regulation | 2024 |

Objectives of the course:

- Understand basic concepts of Statistical Methods
- Have a basic understanding of measures of location
- Have a basic understanding of measures of dispersion
- Understand about Measures of Skewness
- Understand about correlation

| UNITS | Contents | COs | Cognitive Levels |
|-----------------|--|-----|----------------------|
| UNIT-I | Introduction - scope and limitations of statistical methods - classification of data -Tabulation of data- Diagrammatic and Graphical representation of data – Graphical, determination of Quartiles ,Deciles and Percentiles | CO1 | K1 K2 K3 |
| UNIT-II | Measures of location: Arithmetic mean, median, mode, geometric mean and Harmonic mean and their properties. | CO2 | K1 K2 K3 |
| UNIT-III | Measures of dispersion: Range, Quartile deviation, mean deviation, Standard deviation, combined Standard deviation, and their relative measures | CO3 | K1 K2 K3 |
| UNIT-IV | Measures of Skewness: Karl Pearson's, Bowley's, and Kelly's and coefficient of Skewness and kurtosis based on moments. | CO4 | K1 K2 K3 |
| UNIT-V | Correlation - Karl Pearson - Spearman's Rank correlation - concurrent deviation methods. Regression Analysis: Simple Regression Equations. | CO5 | K1 K2 K3 K4 |

| CO5 | 3 | 1 | 3 | 2 | 2 | 1 | 1 | - | - | 1 | 3 | 2 | 1 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|---------------------------------------|----------------------------|-------|
| Title of the Course | NUMERICAL METHODS-I | Hours/Week | 04 |
| Course Code | AUEMA13B | Credits | 03 |
| Category | ELECTIVE COURSE -I | Year & Semester | I & I |
| Prerequisites | 12 th Standard Mathematics | Regulation | 2024 |

Objectives of the course:

- To Solve Practical Technical Problems using various Numerical Method Formulas
- To derive appropriate Numerical Methods to solve Algebraic, Transcendental Equations
- To know the Numerical Methods of Solving Simultaneous Linear Equations
- To Acquire Knowledge about Forward Difference and Backward Differences and their Relationship Knowledge about Central Difference Operators and Problems based on Various Central Difference Formulae

| UNITS | Contents | COs | Cognitive Levels |
|-----------------|--|-----|------------------|
| UNIT-I | Curve Fitting- Principle of Least square Fitting of straight line $y = ax + b$ parabola $y = ax^2 + bx + c$ exponential curves of forms $y = ax^b$, $y = e^{bx}$, and $y = ab^x$. | CO1 | K1 K2 K3 |
| UNIT-II | The solution of numerical algebraic and transcendental Equations: Bisection method – Iteration Method – Regula Falsi Method – Newton– Raphson method | CO2 | K1 K2 K3 |
| UNIT-III | Solution of simultaneous linear algebraic equations: Gauss elimination method – Gauss Jordan method – Method of Triangularization – Gauss Jacobi method – Gauss Seidel method. | CO3 | K1 K2 K3 |
| UNIT-IV | Finite differences Operators Δ , ∇ and E - relation between them — factorial polynomials. Interpolation with equal intervals: Gregory-Newton forward and backward- interpolation formulas. | CO4 | K1 K2 K3 |
| UNIT-V | Central differences formulae Operators μ , δ and relation with the other operators, Gauss forward and backward formulae, Stirling's formula and Bessel's formula. | CO5 | K1 K2 K3 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|--------------------------------------|----------------------------|--------|
| Title of the Course | DATA STRUCTURE AND ALGORITHMS | Hours/Week | 5 |
| Course Code | AUCDS21 | Credits | 5 |
| Category | CORE -3 | Year & Semester | I & II |
| Prerequisites | Knowledge of Python Programming | Regulation | 2024 |

Objectives of the course:

- To Understand the meaning asymptotic time complexity analysis and various data structures
- To Enhancing the problem solving skills and thinking skills
- To write efficient algorithms and Programs
- To Understanding how linear and non-linear data structures works.
- To Understanding how searching and sorting is performed in Python

| UNITS | Contents | COs | Cognitive Levels |
|-----------------|---|-----|------------------|
| UNIT-I | Arrays and ordered Lists: Algorithm - Data Structure- Types - Abstract data types – asymptotic notations – complexity analysis-Arrays and its Operations – List. Linked lists: Singly linked list – doubly linked lists - Circular linked list, General lists- stacks – Queues – Circular Queues – Evaluation of expressions | CO1 | K1,K2,K3 |
| UNIT-II | Trees and Graphs Trees – Binary Trees – Binary Tree Traversal – Binary Tree Representations – Binary Search Trees - threaded Binary Trees - Application of trees (Sets). Representation of Graphs – Graph implementation – graph Traversals - Minimum Cost Spanning Trees – Shortest Path Problems-Application of graphs | CO2 | K1,K2 |
| UNIT-III | Searching and Sorting – Bubble Sort, Insertion Sort, Selection Sort. Searching – Linear search, Divide and Conquer Technique: Binary search, Merge Sort, Quick Sort. | CO3 | K2,K3,K4 |

| | | | |
|----------------|---|-----|----------|
| UNIT-IV | Greedy Method and Dynamic programming Greedy Method: Knapsack problem– Job Sequencing with deadlines – Optimal storage on tapes. General method – Multistage Graph Forward Method– All pairs shortest path – Single source shortest path – Search Techniques for Graphs – DFS – Connected Components – Bi-Connected Components | CO4 | K2,K3,K4 |
| UNIT-V | Backtracking General Method – 8-Queen"s – Sum Of Subsets – Graph Coloring – Hamiltonian Cycles – Branch And Bound: General Method – Travelling Sales Person Problem | CO5 | K3,K5 |

| Title of the Course | DATASTRUCTUREUSING PYTHON LAB | Hours/Week | 5 |
| Course Code | AUCPDS22 | Credits | 5 |
| Category | CORE - 4 | Year &Semester | I/II SEM |
| Prerequisites | Knowledge of Python Programming | Regulation | 2024 |

Objectives of the course:

- To predict the performance of different algorithms in order to guide design decisions, provide theoretical estimation for the required resources of an algorithm to solve a specific computational problem

| UNITS | Contents | COs | Cognitive Levels |
|---------------------|--|---------------------------------|------------------------|
| LAB EXERCISE | 1. Perform stack operations using arrays. 2. Perform queue operations using arrays. 3. Perform tree traversal operations 4. Search an element in an array using linear search. 5. Search an element in an array using binary search 6. Sort the given set of elements using Merge Sort. 7. Sort the given set of elements using Quick sort. 8. Search the Kth smallest element using Selection Sort 9. Find the Optimal solution for the given Knapsack Problem using Greedy Method. 10. Find all pairs shortest path for the given Graph using Dynamic Programming method 11. Find the Single source shortest path for the given Travelling Salesman problem using Dynamic Programming method 12. Find all possible solution for an N Queen problem using backtracking method 13. Find all possible Hamiltonian Cycle for the given graph using backtracking method | CO1 CO2 CO3 CO4 CO5 | K1, K2,K3, K4,K6 |

Course Learning Outcomes(for Mapping with Pos and PSOs)

On completion of the course the students should be able to

| COs | CO Description | Cognitive Level |
|-----|--|-----------------|
| CO1 | Understand the concepts of Linked List, Stack and Queue. | K1,K2 |
| CO2 | Execute traversal functions on graphs, trees and their applications. | K1,K2,K3 |
| CO3 | Apply searching and sorting techniques using python program | K3,K4 |
| CO4 | Determine the concepts of Greedy Method to apply searching techniques. | K3,K5 |
| CO5 | Apply the backtracking method and dynamic programming concepts to find optimal solution using python programming | K1,K2,K5 |

| | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PSO1 | PSO2 | PSO3 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|-----------------------------|----------------------------|--------|
| Title of the Course | INTRODUCTION TO HTML | Hours/Week | 2 |
| Course Code | AUSDS24 | Credits | 2 |
| Category | SKILL ENHANCEMENT | Year & Semester | I & II |
| Prerequisites | Knowledge of Computer | Regulation | 2024 |

Objectives of the course:

- Create a web page. Insert a graph within a web page.
- Create a link within a web page.
- Create a table within a web page.
- Insert heading levels within a web page.
- Insert ordered and unordered lists within a web page.
- Create a web page using CSS.

| UNITS | Contents | COs | Cognitive Levels |
|-----------------|--|-----|------------------|
| UNIT-I | Introduction: Web Basics: What is Internet–Web browsers–What is Webpage –HTML Basics: Understanding tags. | CO1 | K2,K3 |
| UNIT-II | Tags for Document structure (HTML, Head, Body Tag).Block level text elements :Headings-paragraph(<p> tag)–Font-style elements:(bold, italic, font, small, strong, strike, big tags) | CO2 | K1,K2 |
| UNIT-III | Lists: Types of lists: Ordered, Unordered– Nesting Lists–Other tags: Marquee, HR, BR- Using Images –Creating Hyper-links. CSS: What is CSS- CSS syntax – External CSS –Internal CSS – Inline CSS – Basic styling properties: Color, backgrounds, borders, margins, padding, height/width, text, font. | CO3 | K1,K2,K4 |
| UNIT-IV | Tables: Creating basic Table, Table elements, Caption–Table and cell Alignment – Row span, Col span–Cell padding. | CO4 | K1,K2,K3 |
| UNIT-V | Frames: Frameset–Targeted Links–No frame–Forms: Input, Text area, Select, Option. | CO5 | K1,K2,K5,K6 |

| Title of the Course | PHP Programming | Hours/Week | 2 |
| Course Code | AUSDS25 | Credits | 2 |
| Category | SKILL ENHANCEMENT | Year & Semester | I & II |
| Prerequisites | Knowledge of Internet | Regulation | 2024 |

Objectives of the course:

- To introduce the importance of PHP in web page design.
- To understand the features like functions, forms in PHP.
- To understand Files, OOPs concepts, Cookies, Sessions and Data base.

| UNITS | Contents | COs | Cognitive Levels |
|-----------------|---|-----|------------------|
| UNIT-I | Introduction to PHP -Basic Knowledge of websites -Introduction of Dynamic Website -Introduction to PHP -Scope of PHP -XAMPP and WAMP Installation- PHP Programming Basics -Syntax of PHP | CO1 | K1,K2,K6 |
| UNIT-II | Introduction to PHP Variable -Understanding Data Types -Using Operators -Using Conditional Statements -If(), else if() and else if condition Statement -Switch() Statements -Using the while() Loop -Using the for() Loop | CO2 | K2,K3 |
| UNIT-III | PHP Functions -PHP Functions -Creating an Array -Modifying Array Elements -Processing Arrays with Loops -Grouping Form Selections with Arrays -Using Array | CO3 | K2,K4 |
| UNIT-IV | PHP Advanced Concepts -Reading and Writing Files -Reading Data from a File -Managing Sessions and Using Session Variables | CO4 | K1,K2,K3 |
| UNIT-V | OOPS Using PHP -OOPS Concept-Class, Object, Abstractions, Encapsulation, Inheritance, Polymorphism -Creating Classes and Object in PHP-Cookies and Session Management | CO5 | K3,K4,K5 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|-------------------------------------|----------------------------|----------|
| Title of the Course | FUNDAMENTALS OF DATA SCIENCE | Hours/Week | 05 |
| Course Code | AUCDS31 | Credits | 05 |
| Category | Core-5 | Year & Semester | II & III |
| Prerequisites | Programming knowledge in Python | Regulation | 2024 |

Objectives of the course:

- To understand the basic concepts of Data Science
- To acquire a solid foundation in pandas
- To understand the principles of Data Loading, Storage, and File Formats
- To acquire a solid foundation in Data Wrangling
- To visualize data using plots in python

| UNITS | Contents | COs | Cognitive Levels |
|----------|---|----------|------------------|
| UNIT-I | Data Science: definition, Datafication, Exploratory Data Analysis, The Data science process, A data scientist role in this process. NumPy Basics: The NumPyndarray: A Multidimensional Array Object, Creating ndarrays ,Data Types for ndarrays, Operations between Arrays and Scalars, Basic Indexing and Slicing, Boolean Indexing, Fancy Indexing, Data Processing Using Arrays, Expressing Conditional Logic as Array Operations, Methods for Boolean Arrays , Sorting , Unique. | CO1 | K1, K2, K3, K4 |
| UNIT-II | Getting Started with pandas: Introduction to pandas, Library Architecture, Features, Applications, Data Structures, Series, Data Frame, Index Objects, Essential Functionality (Reindexing, Dropping entries from an axis, Indexing, selection, and filtering), Sorting and ranking, Summarizing and Computing Descriptive Statistics, Unique Values, Value Counts, Handling Missing Data, filtering out missing data. | CO2 | K1, K2, K3 |
| UNIT-III | Data Loading, Storage, and File Formats : Reading and Writing Data in Text Format, Reading Text Files in Pieces, Writing Data Out to Text Format, Manually Working with Delimited Formats, JSON Data, XML and HTML: Web Scraping, Binary Data Formats, Using HDF5 Format, Reading Microsoft Excel Files, Interacting with Databases, Storing and Loading Data in MongoDB | CO2, CO3 | K1, K2, K3, K4 |

| | | | |
|----------------|---|-----|----------------|
| UNIT-IV | Data Wrangling: Combining and Merging Data Sets, Database style Data Frame Merges, Merging on Index, Concatenating Along 2nAxis,Combining Data with Overlap, Reshaping and Pivoting, Reshaping with Hierarchical Indexing, Data Transformation, Removing Duplicates, Replacing Values. | CO4 | K3, K4, K5 |
| UNIT-V | Plotting and Visualization: A Brief matplotlib API Primer, Figures and Subplots, Colors, Markers, and Line Styles, Ticks, Labels, and Legends, Annotations and Drawing on a Subplot, Saving Plots to File, Plotting Functions in pandas, Line Plots, Bar Plots, Histograms and Density Plots, Scatter Plots. | CO5 | K3, K4, K5, K6 |

| CO4 | 3 | 3 | 3 | 3 | 3 | 3 | 2 | - | - | - | 3 | 3 | 3 |
| CO5 | 3 | 3 | 3 | 3 | 3 | 3 | 2 | - | - | 1 | 3 | 3 | 3 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|---------------------------|----------------------------|----------|
| Title of the Course | COMPUTER NETWORKS | Hours/Week | 03 |
| Course Code | AUEDS33B | Credits | 03 |
| Category | Elective III | Year & Semester | II & III |
| Prerequisites | Fundamentals of Computers | Regulation | 2024 |

Objectives of the course:

- To make students understand the concepts of Network hardware and Network Software.
- To analyze different network models
- To impart knowledge on Design Issues of Data Link Layer
- To impart knowledge on IP Addresses and Routing algorithm
- To make the students understand the establishment of Network connection

| UNITS | Contents | COs | Cognitive Levels |
|-----------------|--|----------|------------------|
| UNIT-I | Introduction–Uses of Computer Networks–Network Hardware – Network Software- Types of Network Topologies – OSI Reference Model – TCP/IP Reference Model. | CO1 | K1, K2, K3, K4 |
| UNIT-II | Physical Layer – Guided Transmission media –Wireless Transmission- Transmission Modes: Simple, Half duplex, Full duplex– Public Switched Telephone Network–Local Loop– Trunks – Multiplexing- Switching: Circuit and Packet Switching. | CO2 | K1, K2, K3 |
| UNIT-III | Data Link Layer –Design Issues-Error Detection and Correction- Flow Control and congestion control - Simplex Stop and Wait Protocol- Sliding Window Protocol. | CO2, CO3 | K1,K2, K3, K4 |
| UNIT-IV | Network Layer–Design Issues–Routing Algorithm-IP Protocol – IPV4- IP Addresses-Internet Control Protocols. | CO4 | K3, K4, K5 |
| UNIT-V | Transport Layer: Addressing- Connection Establishment-Connection Release. Internet Transport Protocol: UDP-TCP. Application Layer: DNS- Electronic Mail-World Wide Web. | CO5 | K3,K4, K5, K6 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|-----------------------|----------------------------|----------|
| Title of the Course | E-COMMERCE | Hours/Week | 01 |
| Course Code | AUSDS34 | Credits | 01 |
| Category | Skill Enhancement | Year & Semester | II & III |
| Prerequisites | Knowledge of Internet | Regulation | 2024 |

Objectives of the course:

- Understanding of the foundations and importance of E-commerce
- Understanding of retailing in E-commerce by in terms of branding and pricing strategies determining the effectiveness of market research.
- Assess the Internet trading relationships including Business to Consumer, Business-to- Business, Intra-organizational.
- Knowing key features of Internet, Intranets and Extranets and how they relate to each other.
- Understanding legal issues and privacy in E-Commerce.

| UNITS | Contents | COs | Cognitive Levels |
|----------|--|----------|------------------|
| UNIT-I | E-Commerce: E-Commerce Framework – E-Commerce and Media Convergence– The anatomy of E-commerce applications - E-Commerce Consumer Applications - E-Commerce Organization Applications. | CO1 | K1, K2, K3, K4 |
| UNIT-II | Internet: The Internet Terminology – NSFNET – Architecture and Components– National Research and Education Network – Internet Governance – An overview of Internet Applications. | CO2 | K1, K2, K3 |
| UNIT III | E-Commerce and the World Wide Web: Architectural Frame work for E- commerce–WWW as the architecture–Technology behind the web–Security and the web. | CO2, CO3 | K1, K2, K3, K4 |
| UNIT IV | Electronic Payment Systems: Types of Electronic Payment Systems –Digital token Electronic Payment Systems–Credit Card Based Electronic Payment Systems – Risk and Electronic Payment Systems. | CO4 | K3, K4, K5 |
| UNIT V | Advertising and Marketing on the Internet: E-Commerce Catalogs – Information Filtering – Consumer Data Interface – Emerging tools. Software Agents: Characteristics and Properties of Software Agents | CO5 | K3, K4, K5, K6 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|-----------------------------|----------------------------|----------|
| Title of the Course | BIG DATA ANALYTICS | Hours/Week | 02 |
| Course Code | AUSDS35 | Credits | 02 |
| Category | Skill Enhancement | Year & Semester | II & III |
| Prerequisites | Basic Programming Knowledge | Regulation | 2024 |

Objectives of the course:

- To know the fundamental concepts of big data and analytics.
- To explore tools and practices for working with Big data.
- To learn about stream computing.
- To know about the research that requires the integration of large amounts of data.
- To analyze data by utilizing clustering and classification algorithms.

| UNITS | Contents | COs | Cognitive Levels |
|----------|---|----------|------------------|
| UNIT-I | Big data Introduction: Big Data introduction-definition and taxonomy- Big data value for the enterprise - The Hadoop ecosystem - Introduction to Distributed computing- Hadoop ecosystem – Hadoop Distributed File System (HDFS)Architecture-HDFS commands for loading/getting data-Accessing HDFS through Java program. | CO1 | K1, K2, K3, K4 |
| UNIT-II | Map reduce : Introduction to Map Reduce frame work - Basic Map Reduce Programming: - Advanced Map Reduce programming: Basic template of the Map Reduce program, Word count problem- Streaming in Hadoop- Improving the performance using combiners-Chaining Map Reduce jobs – Joining data from different sources. | CO2 | K1, K2, K3 |
| UNIT III | Pig and Hive: Applications on Big Data Using Pig and Hive–Data processing operators in Pig–Hive services–Hive QL–Querying Data in Hive – Fundamentals of HBase and Zoo Keeper. | CO2, CO3 | K1, K2, K3, K4 |
| UNIT IV | Mongo DB : No SQL databases: Mongo DB: Introduction – Features - Data types - Mongo DB Query language - CRUD operations – Arrays - Functions: Count–Sort–Limit–Skip–Aggregate-Map Reduce. Cursors–Indexes- Mongo Import–Mongo Export. | CO4 | K3, K4, K5 |
| UNIT V | Cassandra: Introduction–Features-Data types–CQLSH-Keyspaces- CRUD operations–Collections–Counter–TTL-Alter commands-Import And Export-Querying System tables | CO5 | K3, K4, K5, K6 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|--|----------------------------|---------|
| Title of the Course | RELATIONAL DATABASE MANAGEMENT SYSTEM | Total Hours | 05 |
| Course Code | AUCDS41 | Credits | 05 |
| Category | Core - 7 | Year & Semester | II / IV |
| Prerequisites | Knowledge of Big data and Data structure and its algorithms | Regulation | 2024 |

Objectives of the course:

- To understand the different issues involved in the design and implementation of a database system.
- To study the physical and logical database designs, database modeling, relational, hierarchical, and network models
- To understand and use data manipulation language to query, update, and manage a database
- To develop an understanding of essential DBMS concepts such as: database security, integrity, Concurrency
- To design and build a simple database system and demonstrate competence with the fundamental tasks Involved with modeling, designing, and implementing a DBMS.

| UNITS | Contents | COs | Cognitive Levels |
|----------------|---|-----|------------------|
| UNIT-I | Introduction: Database System-Characteristics of Database Management Systems- Architecture of Database Management Systems-Database Models System Development Life Cycle-Entity Relationship Model. | CO1 | K4, K5, K6 |
| UNIT-II | Relational Database Model: Structure of Relational Model-Types of keys. Relational Algebra: Unary operations-Set operations-Join operations. Normalization: Functional Dependency- First Normal form-Second Normal Form-Third Normal form- Boyce-Codd Normal Form-Fourth Normal Form. | CO2 | K1, K2, K3, K4 |

| | | | |
|-----------------|---|-----|-------------------|
| UNIT-III | SQL: Introduction. Data Definition Language: Create, alter, drop, rename and truncate statements. Data Manipulation Language: Insert, Update and Delete Statements. Data Retrieval Language: Select statement. Transaction Control Language: Commit, Rollback and Savepoint statements. Single row functions using dual: Date, Numeric and Character functions. Group/Aggregate functions: count, max, min, avg and sum functions. Set Functions: Union, union all, intersect and minus. Subquery: Scalar, Multiple and Correlated subquery. Joins: Inner and Outer joins. Defining Constraints: Primary Key, Foreign Key, Unique, Check, Not Null. | CO3 | K1, K2, K3, K4 |
| UNIT-IV | PL/SQL: Introduction-PL/SQL Basic-Character Set- PL/SQL Structure-SQL Cursor-Subprograms-Functions-Procedures. Exception Handling: Introduction-Predefined Exception-User Defined Exception | CO4 | K2, K3, K4, K5 |
| UNIT-V | Triggers-Implicit and Explicit Cursors-Loops in Explicit Cursor. Transaction Management and Concurrency Control: Transaction – properties (ACID), states, Concurrency control, locks, two phase locking serialization. | CO5 | K2, K3, K4 |

Course Learning Outcomes (for Mapping with Pos and PSOs)

On completion of the course the students should be able to

| COs | CO Description | Cognitive Level |
|-----|--|-----------------|
| CO1 | Design efficient database systems by applying concepts system models. | K4, K5, K6 |
| CO2 | Apply the principles of Normalization to improve the design of databases for real world applications. | K1, K2, K3, K4 |
| CO3 | Apply Structured query language (SQL) for database definition and database manipulation. | K1, K2, K3, K4 |
| CO4 | Formulate queries over relational databases using SQL and PL/SQL | K2, K3, K4, K5 |
| CO5 | Recognize the importance of triggers and transaction management for effective database programming and error handling. | K2, K3, K4 |

| | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PSO1 | PSO2 | PSO3 |
|------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|------|------|------|
| CO1 | 3 | 3 | 2 | 2 | 3 | 2 | 2 | 1 | - | 1 | 3 | 3 | 3 |
| CO2 | 3 | 2 | 3 | 3 | 3 | 3 | 2 | 1 | - | - | 3 | 3 | 3 |
| CO3 | 3 | 3 | 3 | 3 | 3 | 2 | 2 | - | - | - | 3 | 3 | 3 |
| CO4 | 3 | 3 | 3 | 3 | 3 | 2 | 2 | - | 1 | - | 3 | 3 | 3 |
| CO5 | 3 | 3 | 3 | 3 | 3 | 2 | 2 | - | - | 1 | 3 | 3 | 3 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|------------------------|----------------------------|---------|
| Title of the Course | RDBMS LAB USING ORACLE | Total Hours | 05 |
| Course Code | AUCPDS42 | Credits | 05 |
| Category | Core - 8 | Year & Semester | II / IV |
| Prerequisites | Programming knowledge | Regulation | 2024 |

Objectives of the course:

| UNITS | Contents | COs | Cognitive Levels |
|---------------|---|--|------------------------------|
| LAB EXERCISES | <p>LAB EXERCISES:</p> <p>LAB EXERCISES:</p> <p>SQL:</p> <ol style="list-style-type: none"> 1. Implementation of DDL commands of SQL with suitable examples Create table• Alter table• Drop Table• 2. Specifying constraints-Primary Key, Foreign Key, Unique, Check, Not Null. 3. Implementation of DML commands of SQL with suitable examples Insert• Update• Delete• 4. Set Operations. 5. Implementation of different types of Joins Inner Join• Outer Join• Natural Join. 6. Sub-queries. <p>PL/SQL:</p> <ol style="list-style-type: none"> 7. Control Constructs. 8. Exception Handlers. 9. Implicit Cursor. 10. Explicit Cursor. 11. Creation of stored procedure, Execution of procedure and modification of procedure. 12. Functions. 13. Creation of insert trigger, delete trigger, update trigger using database 14. TCL Commands usage (Commit, Rollback, Savepoint) <p>Case Study:</p> <p>Students Monitoring System</p> | <p>CO1</p> <p>CO2</p> <p>CO3</p> <p>CO4</p> <p>CO5</p> | <p>K3, K4,</p> <p>K5, K6</p> |

Course Learning Outcomes (for Mapping with Pos and PSOs)

On completion of the course the students should be able to

| COs | CO Description | Cognitive Level |
|-----|--|-----------------|
| CO1 | Develop a relational database schema by employing DDL commands. | K3, K4, K5, K6 |
| CO2 | Analyze SQL queries and various types of Sub-queries. | K3, K4, K5, K6 |
| CO3 | Design procedural logic using PL/SQL Control Constructs. | K3, K4, K5, K6 |
| CO4 | Differentiate between Implicit and Explicit Cursors, and apply them within Procedures and Functions. | K3, K4, K5, K6 |
| CO5 | Apply Exception Handlers and Transaction Control Language (TCL) commands to ensure data integrity and program reliability. | K3, K4, K5, K6 |

| | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 | PO10 | PSO1 | PSO2 | PSO3 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|--------------------------------|----------------------------|---------|
| Title of the Course | NETWORK SECURITY | Total Hours | 04 |
| Course Code | AUEDS43B | Credits | 03 |
| Category | Elective - IV | Year & Semester | II / IV |
| Prerequisites | Knowledge of Computer Networks | Regulation | 2024 |

Objectives of the course:

- To understand the fundamentals of Cryptography.
- To acquire knowledge on standard algorithms used to provide confidentiality, integrity and authenticity.
- To give insight about the underlying mathematics in cryptographic algorithms.
- To provide insight into the working of Authentication Mechanisms, Key Management and security
- To give an exposure to different cryptographic algorithms.

| UNITS | Contents | COs | Cognitive Levels |
|----------|---|-----|------------------|
| UNIT-I | Model of network security–Security attacks, services and attacks– OSI security architecture – Classical encryption techniques – SDES – Block cipher Principles DES– Strength of DES–Block cipher design principles – Block cipher mode of operation | CO1 | K1, K2 |
| UNIT-II | Number Theory– Prime number–Modular arithmetic– Euclid’s algorithm | CO2 | K2, K3, K4, K5 |
| UNIT-III | Authentication requirement – Authentication function – MAC – Hash function –Security of hash function and MAC – SHA - HMAC – CMAC | CO3 | K2, K3, K4, K5 |
| UNIT-IV | Authentication applications – Kerberos – X.509 Authentication services - E-mail security–IP security- Web security. | CO4 | K1, K2, K3, K4 |

| | | | |
|---------------|---|-----|---------------|
| UNIT-V | Intruder–Intrusion detection system–Virus and related threats– Counter measures – Firewalls design principles – Trusted systems – Practical implementation of cryptography and security | CO5 | K2, K3, K4 |
|---------------|---|-----|---------------|

| CO5 | 3 | 3 | 2 | 3 | 3 | 3 | 2 | - | - | 1 | 3 | 3 | 3 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|--------------------------------------|----------------------------|---------|
| Title of the Course | DATA MINING AND WAREHOUSING | Total Hours | 02 |
| Course Code | AUSDS44 | Credits | 02 |
| Category | Skill Enhancement Course | Year & Semester | II / IV |
| Prerequisites | Knowledge of Data and its processing | Regulation | 2024 |

Objectives of the course:

- To provide the knowledge on Data Mining and Warehousing concepts and techniques.
- To study the basic concepts of cluster analysis
- To study a set of typical clustering methodologies, algorithms and applications.

| UNITS | Contents | COs | Cognitive Levels |
|-----------------|---|------------|-------------------------|
| UNIT-I | Introduction: Data mining – Functionalities – Classification Introduction to Data Warehousing – Data Preprocessing: Preprocessing the Data – Data cleaning – Data Integration and Transformation – Data Reduction. | CO1 | K1, K2 |
| UNIT-II | Data Mining, Primitives, Languages and System Architecture: Data Mining – Primitives – Data Mining Query Language, Architecture of Data mining Systems. Concept Description, Characterization and Comparison: Concept Description, Data Generalization and Summarization. | CO2 | K2, K3, K4 |
| UNIT-III | Mining Association Rules: Basic Concepts – Single Dimensional Boolean Association Rules From Transaction Databases, Multilevel Association Rules from transaction databases. | CO3 | K2, K3, K4 |
| UNIT-IV | Classification and Prediction: Introduction – Issues – Decision Tree Induction – Bayesian Classification – Classification of Back Propagation. | CO4 | K2, K3, K4, K5 |
| UNIT-V | Cluster Analysis: Introduction – Types of Data in Cluster Analysis, Partitioning Methods – Hierarchical Methods-Density Based Methods | CO5 | K1, K2, K3 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|-----------------------------------|----------------------------|---------|
| Title of the Course | Open Source Software Technologies | Total Hours | 02 |
| Course Code | AUSDS45 | Credits | 02 |
| Category | Skill Enhancement Course | Year & Semester | II / IV |
| Prerequisites | Knowledge of Internet | Regulation | 2024 |

Objectives of the course:

To impart understanding of essentials of open source technologies. Open source technologies course is designed to enable web developers and others with limited programming experience to build dynamic database driven e-commerce web sites using the PHP programming language

| UNITS | Contents | COs | Cognitive Levels |
|----------|--|-----|------------------|
| UNIT-I | Open Source – open source vs. commercial software – What is Linux? – Free Software – Where I can use Linux? - Linux kernel – Linux distributions | CO1 | K1, K2, K3 |
| UNIT-II | Introduction Linux Essential Commands – File System concept – Standard Files –The Linux Security Model – Introduction to Unix – Unix Components Unix Files | CO2 | K2, K3, K4 |
| UNIT-III | Introduction - Apache Explained – Starting, Stopping and Restarting Apache – Modifying the Default configuration – Securing Apache – Set user and Group | CO3 | K1, K2, K3, K4 |
| UNIT-IV | MySQL: Introduction to MySQL – The show databases and table – The USE command –Create Database and Tables – Describe Table | CO4 | K2, K3, K4, K5 |
| UNIT-V | Introduction –PHP Form processing – Database Access with PHP – MySQL, MySQL Functions – Inserting Records – Selecting Records – Deleting Records – Update Records. | CO5 | K2, K3, K4, K5 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|---|----------------------------|-----------|
| Title of the Course | MACHINE LEARNING | Total Hours | 05 |
| Course Code | AUCDS51 | Credits | 04 |
| Category | CORE – 9 | Year & Semester | III & V |
| Prerequisites | Proficiency in Python Programming & Mathematics | Regulation | 2024-2025 |

Objectives of the course:

- To Learn about Machine Intelligence and Machine Learning applications
- To implement and apply machine learning algorithms to real-world applications
- To identify and apply the appropriate machine learning technique to classification, pattern recognition, optimization and decision problems
- To create instant based learning
- To apply advanced learning

| UNITS | Contents | COs | Cognitive Levels |
|-----------------|---|-----|------------------|
| UNIT-I | Introduction Machine Learning - Difference between AI, Machine Learning and Big data. Supervised and unsupervised learning, parametric vs non parametric models, parametric models for classification and regression. | CO1 | K1, K2, K3 |
| UNIT-II | Neural networks and genetic algorithms -Neural Network Representation – Perceptron Model – Multilayer Networks and Back Propagation Algorithms – Genetic algorithms– Hypothesis Space Search. | CO2 | K2, K3, K4 |
| UNIT-III | Bayesian and computational learning Bayes Theorem – Maximum Likelihood – Minimum Description Length Principle – Bayes Optimal Classifier – Naïve Bayes classifier – Bayesian Belief Network – EM Algorithm. | CO3 | K2, K3, K4, K5 |
| UNIT-IV | Instant based learning K- Nearest Neighbour Learning – Locally weighted Regression – Radial Basis Functions – Case Based Learning - Support vector machines. | CO4 | K2, K3, K4 |
| UNIT-V | Advanced learning: Recommendation system-Opinion mining, sentiment analysis – Induction on Inverted Deduction-Inverting Resolution-Analytical Learning – Reinforcement Learning – Q-Learning – Temporal Difference Learning. | CO5 | K2, K3, K4 |

| Course Code | AUEDS55A | Credits | 03 |
| Category | ELECTIVE - V | Year & Semester | III & V |
| Prerequisites | Knowledge of Network Security | Regulation | 2024-2025 |

Objectives of the course:

- To know the objectives of information security
- To understand the importance and application of each of confidentiality, integrity, authentication and availability
- To understand various cryptographic algorithms
- To understand the basic categories of threats to computers and networks

| UNITS | Contents | COs | Cognitive Levels |
|-----------------|---|-----|------------------|
| UNIT-I | Introduction to Information Security: Security mindset, Computer Security Concepts (CIA), Attacks, Vulnerabilities and protections, Security Goals, Security Services, Threats, Attacks, Assets, malware, program analysis and mechanisms. | CO1 | K1, K2, K3, K4 |
| UNIT-II | Program Security: Non-malicious Program errors – Buffer overflow, Incomplete mediation, Time-of-check to Time-of- use Errors, Viruses, Trapdoors, Salami attack, Man-in-the- middle attacks, Covert channels | CO2 | K2, K3, K4, K5 |
| UNIT-III | File protection Mechanisms: User Authentication Designing Trusted O.S: Security polices models of security, trusted O.S design, Assurance in trusted O.S. Implementation examples. | CO3 | K2, K3, K4 |
| UNIT-IV | Security in Networks: Threats in networks, Network Security Controls – Architecture, Encryption, Content Integrity, Strong Authentication, Access Controls, Wireless Security, Honey pots, Traffic flow security | CO4 | K1, K2, K3 |
| UNIT-V | Web Security: Web security considerations, Secure Socket Layer and Transport Layer Security, Secure electronic transaction. Cyber Security: Definition – Crime, Cyber Crime, Information Security, Digital Forensics – Conventional Crime Vs. Cyber Crime - Uniqueness of Cyber Crime – History of Cyber Crimes. | CO5 | K2, K3, K4, K5 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|---|----------------------------|-----------|
| Title of the Course | FINANCIAL ANALYTICS | Total Hours | 04 |
| Course Code | AUEDS55B | Credits | 03 |
| Category | ELECTIVE - V | Year & Semester | III & V |
| Prerequisites | Basic knowledge of statistics, mathematics, and data analysis | Regulation | 2024-2025 |

Objectives of the course:

- To analyze and model financial data.
- To construct and optimize asset portfolios.
- To evaluate and model Risk on various financial assets.
- To use the most powerful and sophisticated routines in R for analytical finance.
- To acquire logical & analytical skills in financial analytics.

| UNITS | Contents | COs | Cognitive Levels |
|-----------------|--|-----|-------------------|
| UNIT-I | Financial Analytics: Introduction: Meaning-Importance of Financial Analytics uses-Features-Documents used in Financial Analytics: Balance Sheet, Income Statement, Cash flow statement-Elements of Financial Health: Liquidity, Leverage, Profitability. Financial Securities: Bond and Stock investments - Housing and Euro crisis - Securities Datasets and Visualization - Plotting multiple series. | CO1 | K3, K4, K5, K6 |
| UNIT-II | Descriptive Analytics: Data Exploration, Dimension Reduction and Data Clustering Geographical Mapping, Market Basket Analysis. Predictive Analytics, Fraud Detection, Churn Analysis, Crime Mapping, Content Analytics, Sentiment Analysis. Analyzing financial data and implement financial models. | CO2 | K3, K4, K5, K6 |
| UNIT-III | Forecasting Analytics: Estimating Demand Curves and Optimize Price, Price Bundling, Non Linear Pricing and Price Skimming, Forecasting, Simple Regression and Correlation Multiple Regression to forecast sales. Modeling Trend and Seasonality Ratio to Moving Average Method, Winter’s Method. | CO3 | K2, K3, K4 |
| UNIT-IV | Business Intelligence & Tableau: Definition of BI – A Brief History of BI – The Architecture of BI. The origin and Drivers of BI. Successful BI Implementation – Analytics Overview – Descriptive, Predictive and Perspective Analytics. Business reporting and Visualization – components - A brief history of data visualization – Different types of charts and graphs | CO4 | K3, K4, K5 |

| | | | |
|---------------|--|-----|------------|
| UNIT-V | Visualizations: Using Tableau to Summarize Data, Slicing and Dicing Financial Data, Charts to Summarize Marketing Data. Functions to Summarize Data, Pricing Analytics, Risk based pricing, Fraud Detection and Prediction, Recovery Management, Loss Risk Forecasting, Risk Profiling, Portfolio Stress Testing. | CO5 | K3, K4, K5 |
|---------------|--|-----|------------|

COURSE DESCRIPTORS

| | | | |
|----------------------------|--------------------------------------|----------------------------|-----------|
| Title of the Course | Grid Computing | Total Hours | 04 |
| Course Code | AUEDS55C | Credits | 03 |
| Category | ELECTIVE - V | Year & Semester | III & V |
| Prerequisites | Basic knowledge of computer networks | Regulation | 2024-2025 |

Objectives of the course:

- To provide the knowledge on the basic construction and use of Grid computing.
- To know and understand the grid computing applications.
- To assess the efficiency of the grid computing in solving large scale scientific problems

| UNITS | Contents | COs | Cognitive Levels |
|----------|--|-----|------------------|
| UNIT-I | Introduction: Early Grid Activity, Current Grid Activity, Overview of Grid Business areas, Grid Applications, Grid Infrastructures. | CO1 | K1, K2 |
| UNIT-II | Grid Computing organization and their Roles: Organizations Developing Grid Standards, and Best Practice Guidelines, Global Grid Forum (GCF), #Organization Developing Grid Computing Toolkits and Framework#, Organization and building and using grid based solutions to solve computing, commercial organization building and Grid Based solutions. | CO2 | K1, K2, K3 |
| UNIT-III | Grid Computing Anatomy: The Grid Problem, The conceptual of virtual organizations, # Grid Architecture # and relationship to other distributed technology | CO3 | K3, K4, K5 |
| UNIT-IV | The Grid Computing Road Map: Autonomic computing, Business on demand and infrastructure virtualization, Service-Oriented Architecture and Grid, Semantic Grids. | CO4 | K2, K3, K4 |
| UNIT-V | Merging the Grid services Architecture with the Web Services Architecture: Service-Oriented Architecture, Web Service Architecture, #XML messages and Enveloping#, Service message description Mechanisms, Relationship between Web Services and Grid Services, Web services Interoperability and the role of the WS-I Organization. | CO5 | K1, K2, K3 |

COURSE DESCRIPTORS

| | | | |
|----------------------------|--|----------------------------|-----------|
| Title of the Course | OPERATING SYSTEM | Total Hours | 04 |
| Course Code | AUEDS56A | Credits | 03 |
| Category | ELECTIVE - VI | Year & Semester | III & V |
| Prerequisites | Basic knowledge of Data Structures and Computer Organization | Regulation | 2024-2025 |

Objectives of the course:

- To understand the fundamental concepts and role of Operating System.
- To learn the Process Management and Scheduling Algorithms.
- To understand the Memory Management policies.
- To gain insight on I/O and File management techniques.
- Analyze resource management techniques

| UNITS | Contents | COs | Cognitive Levels |
|-----------------|--|-----|------------------|
| UNIT-I | Introduction- views and goals – Operating System Services - User and Operating System interface - System Call- Types of System Calls – Operating System Design and Implementation - Operating System Structure. Process Management: Process concept- Process Scheduling - Operations on Processes- Inter process Communication | CO1 | K1, K2 |
| UNIT-II | .Process Scheduling: Basic Concepts-Scheduling Criteria Scheduling Algorithm Multiple Processor Scheduling CPU Scheduling. Synchronization: The Critical-Section Problem - Synchronization Hardware – Semaphores | CO2 | K1, K2, K3, K4 |
| UNIT-III | Deadlocks: Deadlock Characterization - Methods for Handling Deadlocks- Deadlock Prevention- Deadlock Avoidance - Deadlock Detection- Recovery from Deadlock. | CO3 | K3, K4, K5 |
| UNIT-IV | Memory-Management Strategies: Swapping - Contiguous Memory Allocation Segmentation- Paging - Structure of the Page Table. Virtual-Memory Management: Demand Paging - Page Replacement - Allocation of Frames -Thrashing. | CO4 | K2, K3, K4 |

| | | | |
|---------------|---|-----|---------------|
| UNIT-V | Storage Management: File System- File Concept - Access Methods- Directory and Disk Structure -File Sharing- Protection. Allocation Methods - Free- Space Management - Efficiency and Performance – Recovery. | CO5 | K2, K3, K4 |
|---------------|---|-----|---------------|

COURSE DESCRIPTORS

| | | | |
|----------------------------|--|----------------------------|-----------|
| Title of the Course | SIMULATION AND MODELING | Total Hours | 04 |
| Course Code | AUEDS56B | Credits | 03 |
| Category | ELECTIVE - VI | Year & Semester | III & V |
| Prerequisites | Probability distributions and random variables | Regulation | 2024-2025 |

Objectives of the course:

- In this course, modeling and simulation (M&S) methodologies considering the theoretical aspects.
- A wide range of Modeling and Simulation concepts that will lead you to develop your own M&S applications.
- Students learn the methodologies and tools for simulation and modeling of a real time problem/ mathematical model.

| UNITS | Contents | COs | Cognitive Levels |
|----------|---|-----|------------------|
| UNIT-I | Introduction To Modeling & Simulation – What is Modeling and Simulation? – Complexity Types – Model Types – Simulation Types – M&S Terms and Definitions Input Data Analysis Simulation Input Modeling | CO1 | K1, K2, K3 |
| UNIT-II | Random Variate Generation – Random Numbers – Random Number Generators – General principles – Inverse Transform Method –Acceptance Rejection Method –Composition Method Relocate and Rescale Method – Specific distributions-Output Data Analysis | CO2 | K2, K3, K4, K5 |
| UNIT-III | Comparing Systems via Simulation – Introduction – Comparison Problems – Comparing Two Systems - Screening Problems Selecting the Best – Comparison with a Standard - Comparison with a Fixed Performance Discrete Event Simulations Introduction - Next-Event Time Advance | CO3 | K2, K3, K4, K5 |
| UNIT-IV | Entity Modeling – Entity Body Modeling – Entity Body Visualization – Entity Body Animation – Entity Interaction Modeling – Building Modeling Distributed Simulation – High Level Architecture (HLA) – Federation Development and Execution Process (FEDEP) | CO4 | K2, K3, K4 |

| | | | |
|---------------|--|-----|---------------|
| UNIT-V | Optimization Algorithms – Genetic Algorithms – Simulated Annealing Examples: Sensor Systems Modeling – Human Eye Modeling – Optical Sensor Modeling – Radar Modeling. | CO5 | K2, K3, K4 |
|---------------|--|-----|---------------|
