Department of Mathematics
B.Sc.,Mathematics
(2017-2018)

Program Outcomes:

S.No	OUTCOMES
PO1	Logical thinking, critical analysis, and reasoning skills will be highly improved
PO2	Express mathematical ideas clearly and concisely to others
PO3	Ability to apply suitable mathematical techniques to handle problems in physical and related sciences.
PO4	To demonstrate conceptual understanding of basic definitions, and theorems in Mathematics and should be able to describe elaborately with examples.
PO5	Ability to solve mathematical problems by applying the skills such as critical thinking, logical reasoning, and abstraction
PO6	Select appropriate mathematical models and tools to solve the problems including those in real-life contexts.
PO7	Mathematics has its own universal language of symbols and notations. Students are expected to apply the Mathematics language appropriately while expressing mathematical ideas in both oral and written form.
PO8	Problem-solving techniques in mathematics will enhance the knowledge of students to formulate and solve any real-world problems independently.
PO9	Develop the knowledge of abstract mathematical concepts.
P10	Enhance the employability skills in both public and private sector jobs.

Program Specific Outcomes:

S.No	OUTCOMES
PSO1	Prepare and Motivate Students for Research Studies in Mathematics and Related Fields.
PSO2	Provide Advanced Knowledge on Topics in Pure Mathematics, Empowering the Students to Pursue Higher Degrees at Reputed Academic Institutions.
PSO3	Having an Ability to use Mathematics in Techniques, Skills, Resources on Real Life
PSO4	Having Problem Solving Ability- to Assess Social Issues (Societal, Health, Safety, Legal and Cultural) as a Mathematician.
PSO5	Having Adaptive Thinking and Adaptability in Relation to Environmental Context and Sustainable Development.
PSO6	Having a Clear Understanding of Professional and Ethical Responsibility.

Semester: I

Subject Name: Algebra   **No. of Hours per Week:** 05

Subject Code: BMA11   **Credit:** 03

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
I (Regulation 2017-2018)	Algebra	03	1. After studied unit -1, the student will be able to demonstrate the knowledge of the relationship between roots and coefficients of the given equation. 2. After studied unit -2, the student will be able to carry out the calculations of approximate roots of the given polynomial equation. 3. After studied unit -3, the student will be able to find the sum to infinity of the given binomial/exponential/logarithmic series. 4. After studied unit -4, the student will be able to demonstrate the knowledge of matrices and calculate the Eigen values and Eigen vectors of a given square matrix. 5. After studied unit -5, the student will be able to discuss the basic number theory concepts.

Semester: I

Subject Name: Trigonometry

No. of Hours per Week: 04

Subject Code: BMA12

Credit: 03

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
I (Regulation 2017-2018)	Trigonometry	03	1. After studied unit -1, the student will be able to write the expansions of cosnθ and sinnθ in powers of cosθ and sinθ. 2. After studied unit -2, the student will be able to expand the powers of sines and cosines of θ in terms of functions of multiples of θ 3. After studied unit -3, the student will be able to discuss the concepts of hyperbolic functions. 4. After studied unit -4, the student will be able to demonstrate knowledge of the logarithm of complex quantities. 5. After studied unit -5, the student will be able to carry out the calculations of summation of trigonometric series

Semester: I

Subject Name: Numerical Methods - I   **No. of Hours per Week:** 07

Subject Code: BAMA13A   **Credit:** 04

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
I (Regulation 2017-2018)	Numerical Methods - I	03	1. After studied unit -1, the student will be able to solve simultaneous linear equations by Gauss elimination method, Gauss-Jordan Method, and Gauss-Seidel method. 2. After studied unit -2, the student will be able to calculate interpolation values by applying Gregory-Newton"s forward and backward formulae. 3. After studied unit -3, the student will be able to calculate the central interpolation values by applying central differences formulae. 4. After studied unit -4, the student will be able to estimate one or more missing terms of the given set of data. 5.After studied unit -5, the student will be able to estimate the interpolation value for unequal intervals based on Lagrange"s formula of inverse interpolation

Semester: III

Subject Name: Differential Equations

No. of Hours per Week: 06

Subject Code: BMA31

Credit: 04

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
III (Regulation 2017-2018)	Differential Equations	04	1. After studied unit -1, the student will be able to know the various methods of solving the first-order higher degree differential equations. 2. After studied unit -2, the student will be able to carry out the different methods of solving the second order differential equations. 3. After studied unit -3, the student will be able to understand the concepts of total differential equations and solve the problems. 4. After studied unit -4, the student will be able to demonstrate knowledge of Laplace transform and its applications. 5. After studied unit -5, the student will be able to solve partial differential equations.

Semester: V

Subject Name: Dynamics   **No. of Hours per Week:** 03

Subject Code: BEMA56A   **Credit:** 03

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
V (Regulation 2017-2018)	Graph Theory	03	1. After studied unit -1, the student will be able to know various graph structures and isomorphism between graphs. 2. After studied unit -2, the student will be able to know the representation of the graphs in matrix form. 3. After studied unit -3, the student will be able to know the concepts of connected graph, component, cut point, and bridge of a graph. 4. After studied unit -4, the student will be able to know about trees and their applications. 5. After studied unit -5, the student will be able to demonstrate knowledge of Eulerian and Hamiltonian graphs.

Semester: V

Subject Name: Mathematics for Competitive Examinations – II   **No. of Hours per Week:** 03

Subject Code: BSMA57   **Credit:** 03

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
V (Regulation 2017-2018)	Mathematics for Competitive Examinations – II	03	1. After studied unit-1, the students will be able to solve real-life problems related to percentages. 2. After studied unit-2, the student will be able to carry out the problems related to profit and loss 3. After studied unit-3, the student will be able to carry out problems related to ratio and proportion 4. After studied unit-4, the student will be able to demonstrate knowledge of logarithms, partnership, and chain rule and solve the related problems. 5. After studied unit-1, the students will be able to solve real-life problems related to time and work.

Semester: VI

Subject Name: Linear Algebra   **No. of Hours per Week:** 05

Subject Code: BMA61   **Credit:** 04

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
VI (Regulation 2017-2018)	Linear Algebra	04	1. After studied unit -1, the student will be able to identify linear dependent and independent vectors. 2. After studied unit -2, the student will be able to classify orthogonal and orthonormal vectors. 3. After studied unit -3, the student will be able to know about the algebra of linear transformations. 4. After studied unit -4, the student will be able to know about the matrix of a linear transformation and its properties. 5. After studied unit -5, the student will be able to solve a system of linear equations

Semester: VI

Subject Name: Real Analysis- II   **No. of Hours per Week:** 05

Subject Code: BMA62   **Credit:** 04

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
VI (Regulation 2017-2018)	Real Analysis II	04	1. After studied unit-1, the student will be able to demonstrate knowledge of connected sets and complete metric spaces with suitable examples. 2. After studied unit-2, the student will be able to identify the functions which are continuous and uniformly continuous. 3. After studied unit-3, the student will be able to express about Riemann integration and its properties. 4. After studied unit-4, the student will be able to carry out the problems related to Rolle''s theorem and the law of mean. 5. After studied unit-5, the student will be able to demonstrate knowledge of pointwise convergence, uniform convergence of sequences of functions, and of series of functions.

Semester: VI

Subject Name: Complex Analysis II   **No. of Hours per Week:** 05

Subject Code: BMA63   **Credit:** 04

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
VI (Regulation 2017-2018)	Complex Analysis II	04	1. After studied unit-1, the student will be able to gain knowledge about complex functions and their nature, continuous functions, necessary and sufficient conditions of an analytic function 2. After studied unit-2, the student will be able to demonstrate knowledge of elementary transformations, conformal and bilinear transformations with examples. 3. After studied unit-3, the student will be able to evaluate contour integrals using Cauchy's integral formula. 4. After studied unit-4, the student will be able to express a function as Taylor series or Laurent's series at the given domain, and also determine the circle or annulus of convergence power series expansions of analytic functions. 5. After studied unit-5, the student will be able to carry out the problems related to the evaluation of improper integrals.

Semester: VI

Subject Name: Programming in C Language   **No. of Hours per Week:** 03

Subject Code: BMA64   **Credit:** 03

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
VI (Regulation 2017-2018)	Programming in C Language	03	1. After studied unit -1, the student will be able to demonstrate „c‟ tokens, keywords, the basic structure of C programs and the execution of a „C‟ Program. 2. After studied unit -2, the student will be able to express the nature of constants, variables, data types, declaration of variables, and assigning values to variables. 3. After studied unit -3, the student will be able to describe valuation of expressions and usage of various operators. 4. After studied unit -4, the student will be able to express the logic using control statements. 5. After studied unit -5, the student will be able to demonstrate knowledge pertaining to arrays.

Semester: VI

Subject Name: Operations Research   **No. of Hours per Week:** 03

Subject Code: BEMA65A   **Credit:** 03

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
VI (Regulation 2017-2018)	Operations Research	03	1. After studied unit -1, the student will be able to determine the critical activities of a repeated project and its completion time. 2. After studied unit -2, the student will be able to determine the duration of activities of a new project based on three-time estimates. 3. After studied unit -3, the student will be able to carry out the EOQ level of various inventory control models. 4. After studied unit -4, the student will be able to calculate processing times of sequencing of jobs through 2, 3, and m machines. 5. After studied unit -5, the student will be able to find out the length of the queue, and waiting time in the queue under single and multi-channel queuing models.

Subject Code: BEMA66A   **Credit:** 03

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
VI (Regulation 2017-2018)	Special functions	03	1. After studied unit -1, the student will be able to acquire the concept of linear operators, and solve simultaneous linear differential equations. 2. After studied unit -2, the student will be able to interpret Adams and Modified Adams method and extrapolation techniques. 3. After studied unit -3, the student will be able to understand the concept of power series solution. 4. After studied unit -4, the student will be able to explain the concepts of Bessel functions, Legendre functions, and their properties. 5. After studied unit -5, the student will be able to analyze term-by-term differentiation of the Fourier series and Legendre series.

Semester: VI

Subject Name: Mathematics For Competitive Examinations-III   **No. of Hours per Week:** 03
Subject Code: BSMA67   **Credit:** 03

Course Outcomes:

Semester	Course Name	Course Credit	Course Outcomes
VI (Regulation 2017-2018)	Mathematics For Competitive Examinations-III	03	1. After studied unit -1, the student will be able to solve the problems related to time and distance. 2. After studied unit -2, the student will be able to carry out the boat and stream, train, and speed- based questions. 3. After studied unit -3, the student will answer the questions based on alligation or mixture. Aspirants preparing for the upcoming competitive examinations will be able to answer such questions in a faster way. 4. After studied unit -4, the student will be able to carry out problems related to compound interest. 5. After studied unit -5, the student will be able to demonstrate knowledge of area-related problems.
