

K.M.G. COLLEGE OF ARTS AND SCIENCE
B.Sc MICROBIOLOGY – (2020-2021 onwards)

Program Outcomes:

<u>S.No</u>	<u>OUTCOMES</u>
PO1	The course will help them to impart the knowledge of the basic principles of microbiology, bacteriology, mycology, immunology, virology and algal technology including the nature of pathogenic microorganisms, pathogenesis, laboratory diagnosis, transmission, prevention and control of diseases common in the country.
PO2	Students will demonstrate competency in laboratory safety and in routine and specialized microbiological laboratory skills applicable to microbiological research or clinical methods, including accurately reporting observations and analysis. Students will demonstrate engagement in the Microbiology discipline through involvement in research or internship activities.
PO3	So it understand the relationship between the science and society by recognizing and discussing logical, scientific and ethical issues in Microbiology.
PO4	As program outcomes will help the students to learn the theoretical and practical view of the syllabus. It will help them to understand the courses fundamentally and its outcomes to develop their subject skills
PO5	Communicate and collaborate with other disciplines by effectively communicating the fundamental concepts of Microbiology in written and oral format. Identify credible scientific sources to interpret and evaluate the evidences.
PO6	Understand the issues of environmental contexts and sustainable development.
PO7	Understand the relationship between science and society by recognizing and discussing logical, scientific and ethical issues in microbiology.
PO8	Analyze and interpret results from a variety of microbiological methods
PO9	Ability to apply the process of science by formulating hypotheses and design experiments based on the scientific method
PO10	The course is reasoning and application based, making the students eligible for higher studies, jobs in various sectors and Entrepreneurship abilities.

Program specific Outcomes:

S.No	OUTCOMES
PSO1	A general course emphasizing distribution, morphology and physiology of microorganisms in addition to skills in aseptic procedures, isolation and identification of microorganism from plant, animal, food, water, soil and human.
PSO2	On successful completion of graduation for UG and PG students will gain insight of Microbiology starting from history, basic laboratory techniques and fundamental knowledge about the microorganisms.
PSO3	The skill enhancement elective course such as algal technology, mushroom cultivation and herbal technology to develop their knowledge.
PSO4	They will be well-informative about the integral role of microorganisms associated with specific disease, vital role of microorganisms in biotechnology, fermentation, medicine, and other industries important to human well being.
PSO5	will acquire the skill in the use and care of basic microbiological equipment; performance of basic laboratory procedures in microbiology; proper collection and forwarding of microbiological and medical.
PSO6	Use appropriate microbiological and molecular lab equipment and methods.
PSO7	Estimate the number of microorganisms in a sample by suitable enumeration technique
PSO8	Use pure culture and selective techniques to isolate microorganisms. Identify microorganisms (media-based, molecular and serological).
PSO9	Document and report on experimental protocols, results and conclusions.
PSO10	Practice safe microbiology, using appropriate protective, biosafety and emergency procedures.

EXPERIMENTS IN MEDICAL MICROBIOLOGY

SUBJECT CODE:CPMB66

NO.OF.HOURS/ WEEK: 06

Course Out Comes

CREDITS:3

TOTAL HOURS:39

Semester	Course Name	Course Credit	Course Outcomes
VI Regulation (2020-2021)	EXPERIMENTS IN MEDICAL MICROBIOLOGY	03	CO1 - the student will be able to observe pathogenic microorganisms in specimens by microscopy
			CO2- the student will be able to isolate pathogenic bacteria from clinical specimens
			CO3- the student will be able to identify pathogenic bacteria from clinical specimens
			CO4- the student will be able to characterize pathogenic bacteria isolated from clinical specimens
			CO5-. the student will be able to find out the antibiotic susceptibility pattern of pathogenic bacteria.

Course Out Comes

Semester	Course Name	Course Credit	Course Outcomes
VI Regulation (2020- 2021)	BIOTECHNO LOGY	03	CO1 - After studying unit-1, the student will be able to understand basic concepts of Biotechnology
			CO2- After studying unit-2, the student will be able to demonstrate the uses of enzymes
			CO3- After studying unit-3, the student will be able to express the importance of plant biotechnology
			CO4- After studying unit-4, the student will be able to explain the role of animal biotechnology
			CO5-. After studying unit-5, the student will be able to discuss the role of microorganisms in environment.
